# Huawei Mate 10

# Teardown

## INTRODUCTION

[video: <https://www.youtube.com/watch?v=VzHGAI9cAXY>]

If you got a broken Huawei Mate 10, you can follow this video to disassemble the phone. The structure of Huawei Mate 10 is clear and simple. The only hard work is to remove the back cover. We need to heat up the edges of back glass and cut the adhesive below.

During reassembly, replace old adhesive with [double-sided adhesive tape](#) or [pre-cut adhesive strips](#).

### TOOLS:

- [Tweezers](#) (1)
- [Phillips #00 Screwdriver](#) (1)
- [Suction Handle](#) (1)
