INTRODUCTION

This guide will teach you how to safely replace the battery for the Sony Smart Watch SW2.

⚒ TOOLS:

- Soldering Workstation (1)
- Flathead Screwdriver (1)

This document was generated on 2020-11-23 05:45:49 PM (MST).
Step 1 — Display Assembly

- Detach the smart watch from the band by pushing on the back of the watch housing.

  - The power button may fall out once the smart watch is detached.

- Set aside the power button and watch band as they are no longer needed for further disassembly.

Step 2

- Use a plastic opening tool to carefully pry the LCD screen from the watch housing.

Step 3

- Use a plastic opening tool or spudger to lift the screen assembly press-fit connector free.

Step 4

- Set aside the detached LCD screen to access the battery.
Step 5 — Battery

- Lift one side of the battery up carefully. There is a thin black circuit adhered to the back of the battery that connects to the motherboard and the charger.

- (i) The connection is already broken in this image and you will not be able to lift the battery this high.

Step 6

- Push the black piece down while very carefully pulling the battery off. Work your way around without lifting the black piece up too much.

Step 7

- Once the battery is free from the frame adhesive, [desolder](#) the black and red battery wires.

- Remove the battery.

To reassemble your device, follow these instructions in reverse order after the battery is replaced.
