

# Dell Alienware 13 R2 Display Back-Cover Replacement

In this guide, we will show you how to remove and replace the display back-cover.

Written By: Terrence15

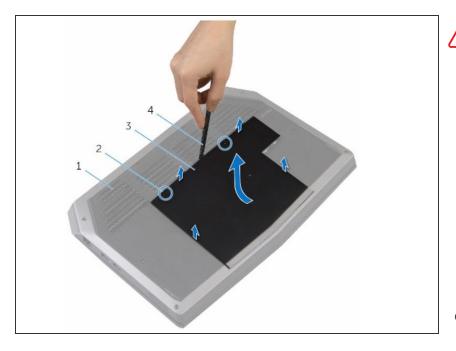

# INTRODUCTION

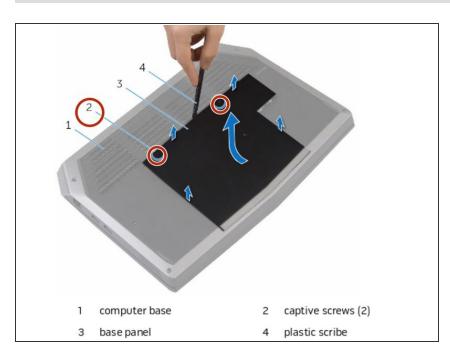

In this guide, we will show you how to remove and replace the display back-cover.

**TOOLS:**Pro Tech Toolkit (1)

#### Step 1 — Turning Over the PC

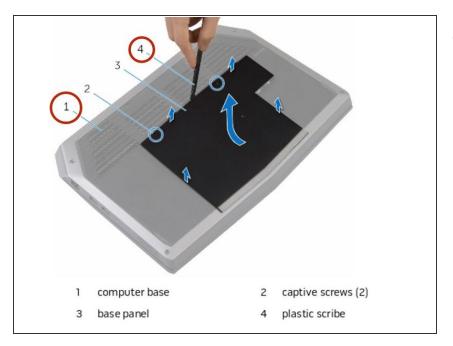

- WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your</u> <u>Computer</u> After working inside your computer, follow the instructions in <u>After Working Inside Your Computer</u> For more safety best practices, see the regulatory compliance home page.
  - Close the display and turn the computer over.

# Step 2 — Loosen the screws

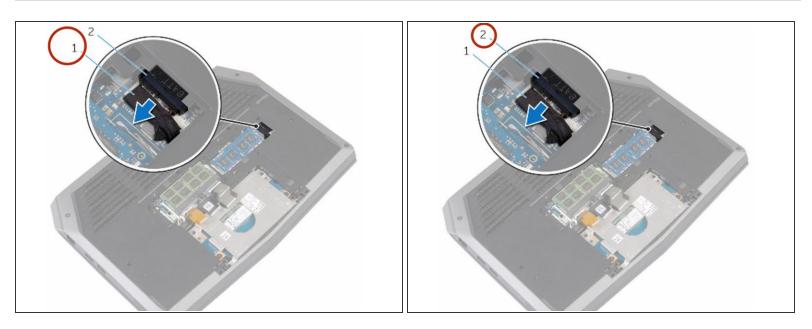

• Loosen the captive screws that secure the base panel to the computer base.

## Step 3 — Releasing the Tabs

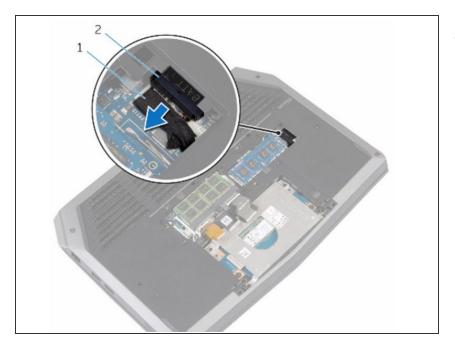

• Using a plastic scribe, gently release the tabs that secure the base panel to the computer base.

## Step 4 — Disconnecting the Battery Cable

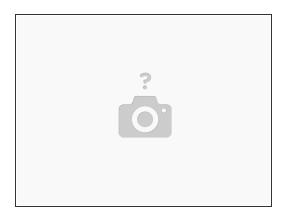

- Disconnect the battery cable from the battery-cable connector.
- Turn the computer over.

## Step 5 — Power Button

 Press and hold the power button for 5 seconds to ground the system board.

#### Step 6 — Connect the Battery Cable

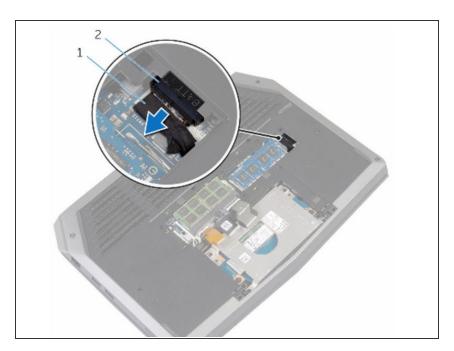

• Connect the battery cable to the battery-cable connector.

## Step 7 — Aligning the tabs

 Align the tabs on the base panel with the slots on the computer base and snap the base panel into place.

#### Step 8 — Tighten the screws

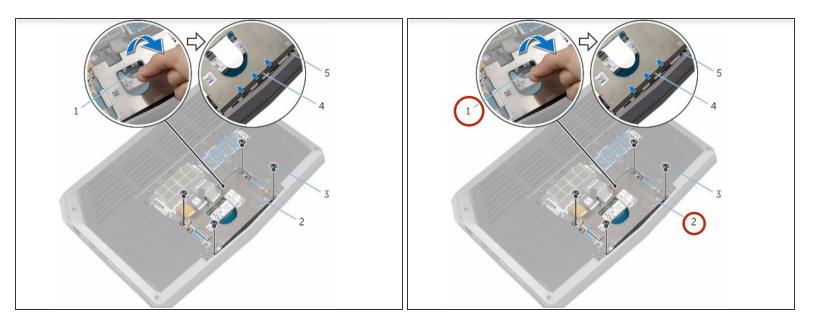

• Tighten the captive screws that secure the base panel to the computer base.

#### Step 9 — Removing the Screws

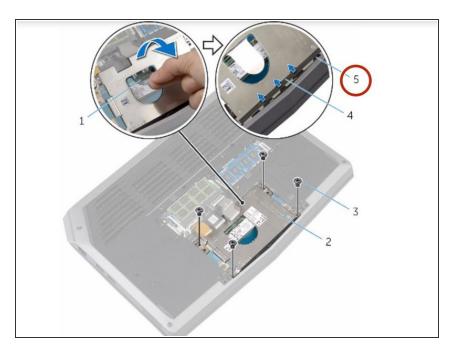

- MARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your Computer</u>. After working inside your computer, follow the instructions in <u>After Working Inside Your Computer</u>.
- Remove the screws that secure the solid-state drive bracket to the solid-state drive assembly.

#### Step 10 — Peel off Computer Base Tabs

 Using the pull tab, pivot the solid-state drive bracket and peel off the bracket from the tabs on the computer base.

# Step 11 — Disconnecting the Solid-State Drive Cable

 Using the pull tab, disconnect the solid-state drive cable from the system board.

## Step 12 — Removing the Solid-State Drive

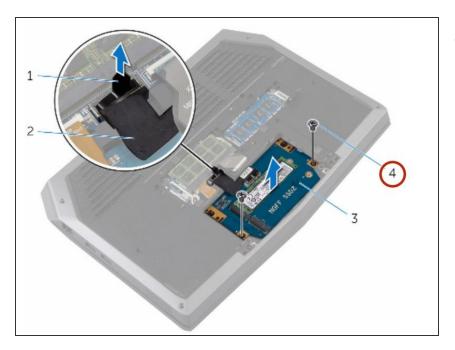

• Remove the screws that secure the solid-state drive assembly to the computer base.

# Step 13 — Lifting the Solid-State Assembly

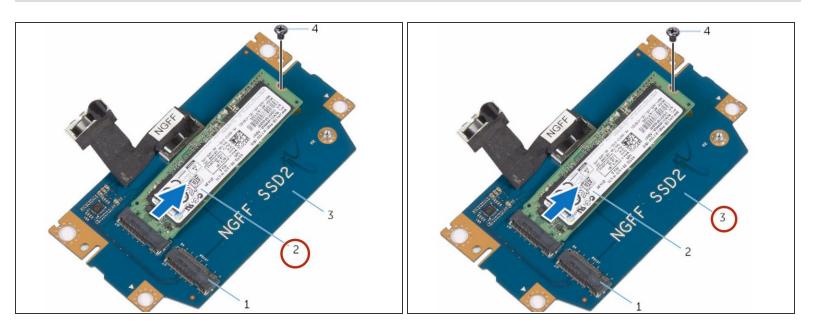

• Lift the solid-state drive assembly off the computer base.

## Step 14 — Remove the Screw

 Remove the screw that secures the solid-state drive to the solid-state drive assembly.

## Step 15 — Lift the Solid-State Assembly.

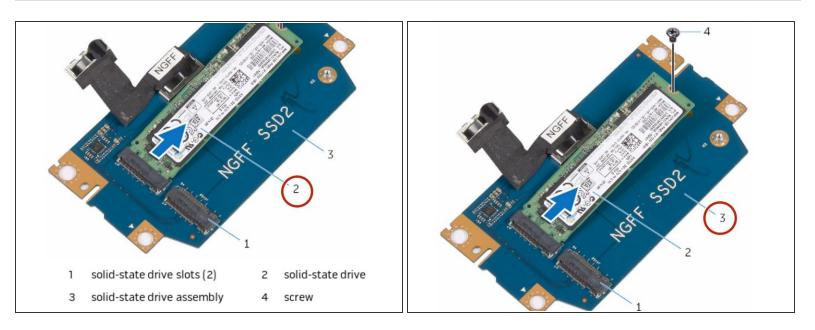

• Slide and lift the solid-state drive off the solid-state drive assembly.

#### Step 16 — The New Solid-State Drive

 Slide the NEW solid-state drive into the slot on the solid-state drive assembly.

#### Step 17 — Screw Replacement

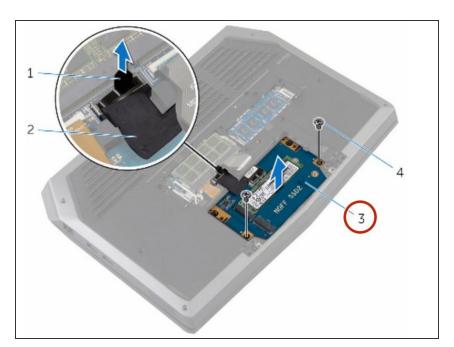

• Replace the screw that secures the solid-state drive to the solid-state drive assembly.

## Step 18 — Align the Screws

 Align the screw holes on the solid-state drive assembly with the screw holes on the computer base.

## Step 19 — Replace the Screws

 Replace the screws that secure the solid-state drive assembly to the computer base.

## Step 20 — Connect the Cable to the System Board

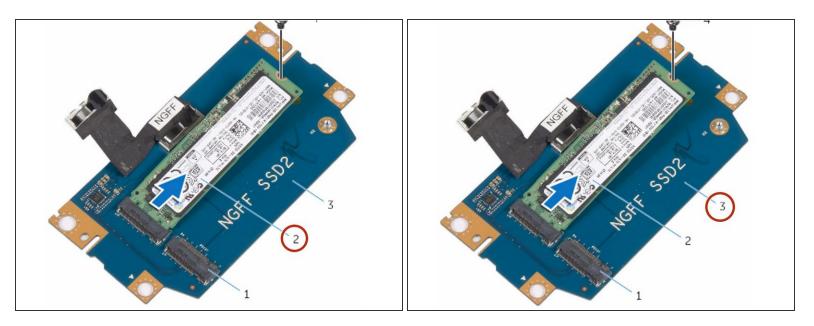

• Connect the solid-state drive cable to the system board.

#### Step 21 — Align the Screw Holes

 Align the screw holes on the solidstate drive bracket with the screw holes on the solid-state drive assembly.

## Step 22 — Replace the Screws

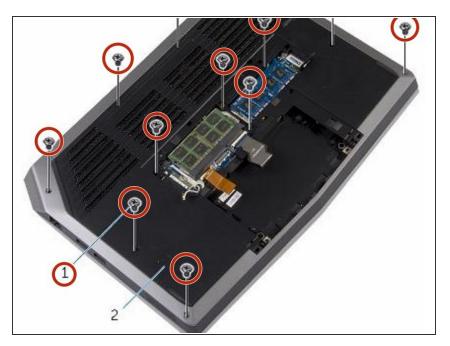

• Replace the screws that secure the solid-state drive bracket to the solid-state drive assembly.

# Step 23 — Lifting the Latches

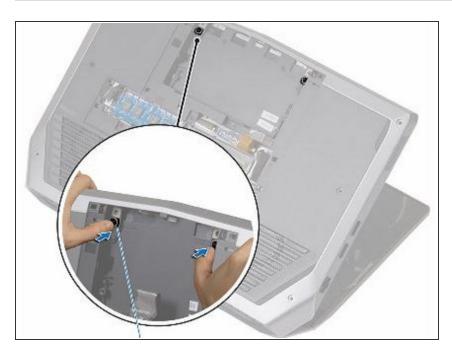

• Lift the latches and disconnect the keyboard and keyboard-backlight cables from the system board.

## Step 24 — Remove the Screws

 Remove the screws that secure the palm-rest assembly to the computer base.

## Step 25 — Lift the Computer Base

• Lift the computer base slightly and push the release tabs on the palm-rest assembly until it pops out.

## Step 26 — Turning the Computer Over

• Turn the computer over and open the display as far as possible.

## Step 27 — Prying the Palm-Rest Assembly

 Using a plastic scribe, pry up along the edges of the palm-rest assembly.

# Step 28 — Lift the Palm-Rest Assembly

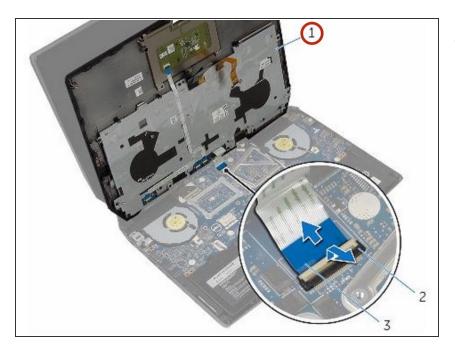

• Gently lift the palm-rest assembly and turn it over.

#### Step 29 — Lift the Connector Latch

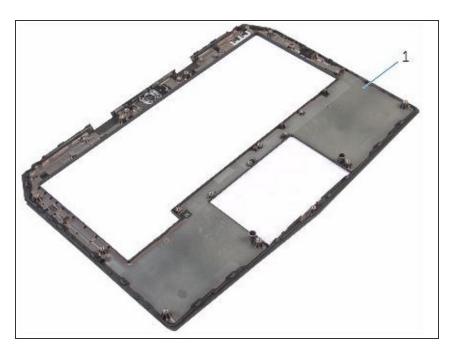

• Lift the connector latch and disconnect the power-button board cable from the system board.

## Step 30 — Lift the Palm-Rest Assembly

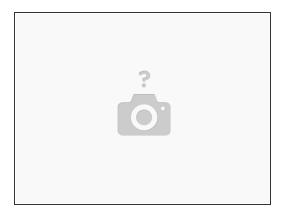

• Lift the palm-rest assembly off the computer base.

## Step 31 — Removing

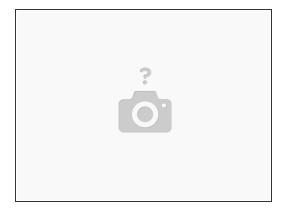

- Remove the keyboard.
- Remove the power-button board.
- Remove the status-light board.
- Remove the Touchpad.

## Step 32 — Replacement

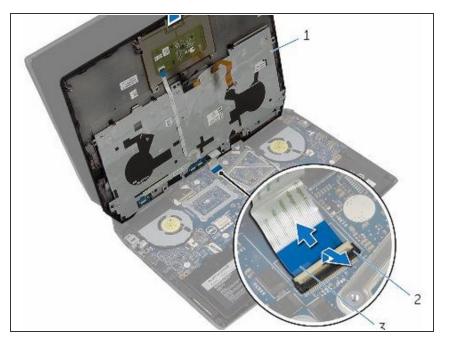

- Replace the touchpad.
- Replace the status-light board.
- Replace the power-button board.
- Replace the keyboard.

# Step 33 — Connecting the Power-Button Board Cable

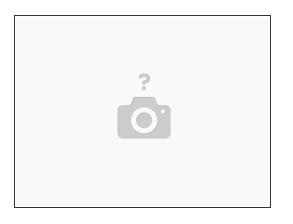

• Connect the power-button board cable to the system board.

## Step 34 — Align the Palm-Rest Assembly

 Align the palm-rest assembly on the computer base and snap it into place.

## Step 35 — Close the Display

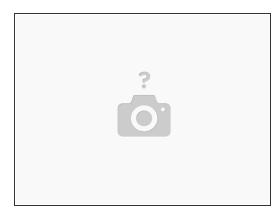

• Close the display and turn the computer over.

## Step 36 — Replace the Screws

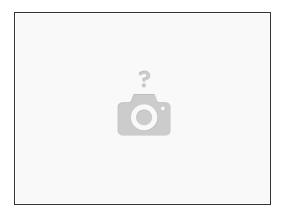

• Replace the screws that secure the palm-rest assembly to the computer base.

## Step 37 — Connect the Keyboard Cable

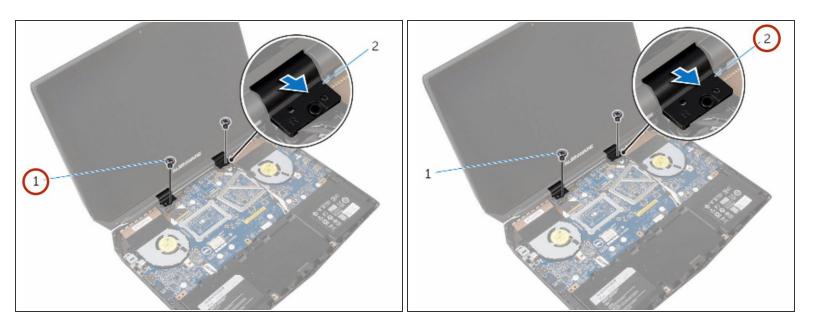

• Connect the keyboard cable and the keyboard-backlight cable to the system board.

#### Step 38 — Open the Display

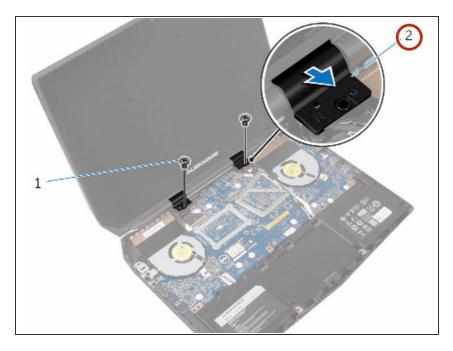

- MARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your Computer</u>. After working inside your computer, follow the instructions in <u>Before Working Inside Your Computer</u>.
- Open the display as far as possible.

#### Step 39 — Remove the Screws

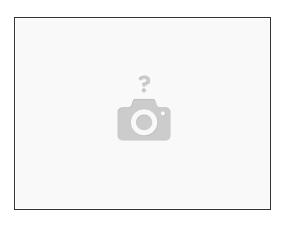

• Remove the screws that secure the hinge caps to the display hinges.

# Step 40 — Lifting the Hinge Caps

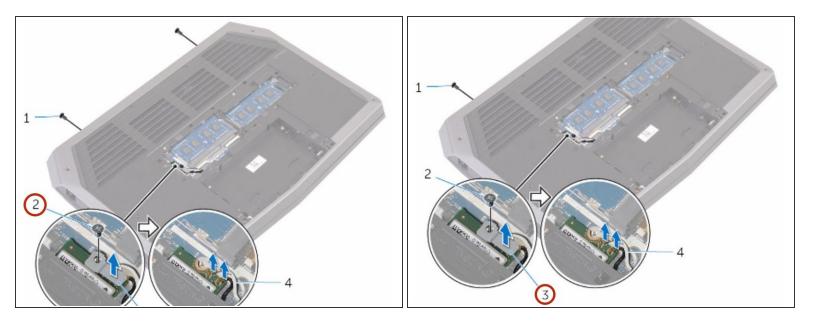

• Slide and lift the hinge caps off the display hinges.

## Step 41 — Close the Display

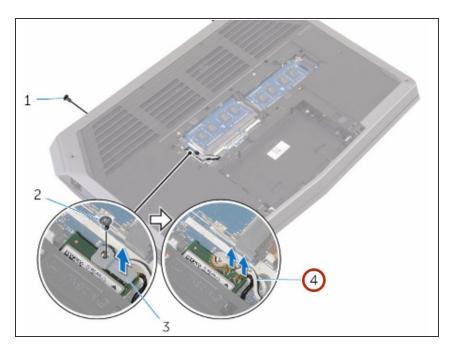

• Close the display and turn the computer over.

## Step 42 — Remove the Screw

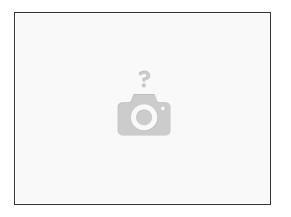

• Remove the screw that secures the wireless-card bracket to the wireless card.

# Step 43 — Disconnect the Antenna Cables

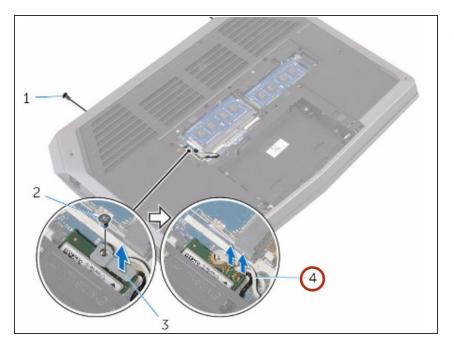

• Disconnect the antenna cables from the wireless card.

## Step 44 — Turn the Computer Over

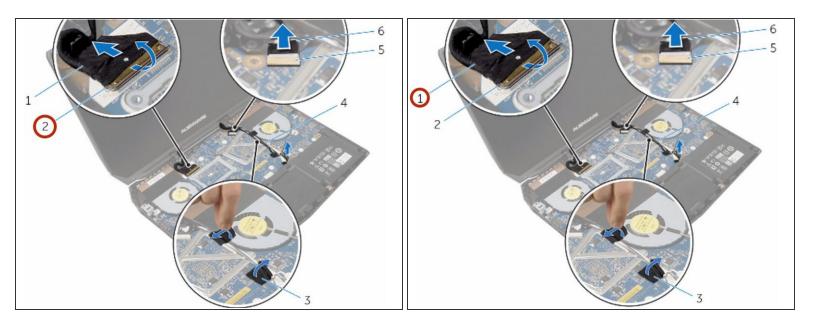

• Turn the computer over and open the display.

## Step 45 — Remove the Antenna Cables

 Remove the antenna cables from the routing guides on the display hinges.

## Step 46 — Disconnect the Display Cable

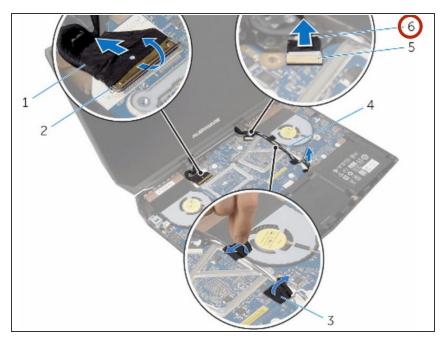

• Lift the connector latch and disconnect the display cable from the system board.

## Step 47 — Remove the Display Cable

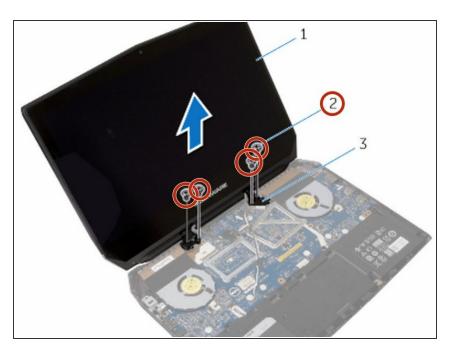

• Remove the display cable from the routing guides on the display hinges.

## Step 48 — Disconnect the Logo-Board Cable

 Disconnect the logo-board cable from the system board and remove it from the routing guides on the display hinges.

#### Step 49 — Remove the Screws

 Remove the screws that secure the display assembly to the computer base.

## Step 50 — Lifting the Display Assembly

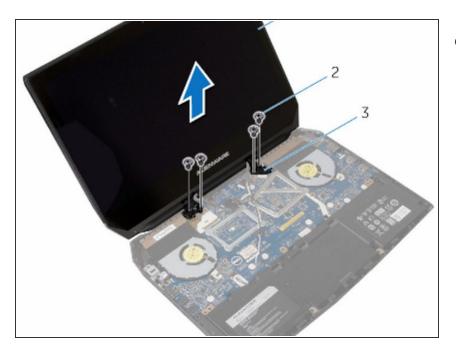

• Lift the display assembly off the computer base.

## Step 51 — Align the Screw Holes

 Align the screw holes on the display hinges with the screw holes on the computer base.

# Step 52 — Replace the Screws

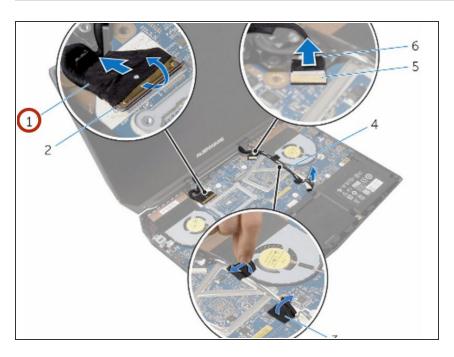

• Replace the screws that secure the display hinges to the computer base.

# Step 53 — Routing the Logo-Board Cable

 Route the logo-board cable through the routing guides on the display hinge and connect the logo-board cable to the system board.

## Step 54 — Route the Cable

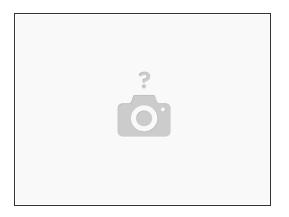

• Route the display cable through the routing guides on the display hinge.

# Step 55 — Slide the Display Cable

 Slide the display cable into the connector on the system board and press down the latch to secure the cable.

## Step 56 — Route the Antenna Cables

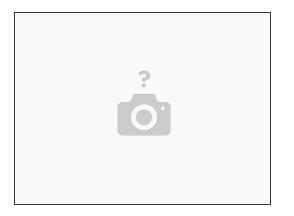

• Route the antenna cables through the routing guides on the display hinges.

## Step 57 — Adhere the Adhesive Tapes

 Adhere the adhesive tapes that secure the antenna cables to the system board.

## Step 58 — Close the Display

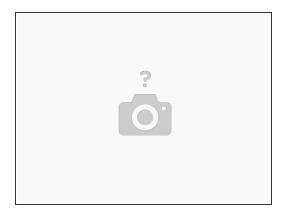

• Close the display and turn the computer over.

# Step 59 — Connect the Antenna Cables

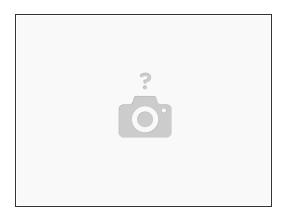

• Connect the antenna cables to the wireless card.

## Step 60 — Replace the Screw

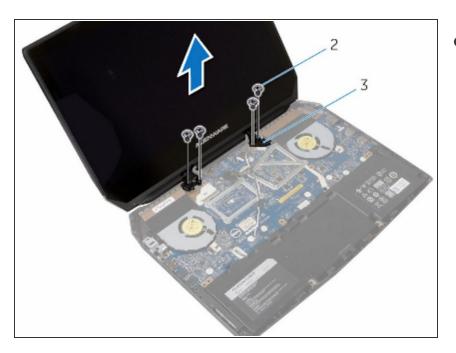

• Replace the screw that secures the wireless-card bracket to the wireless card.

## Step 61 — Open the Display

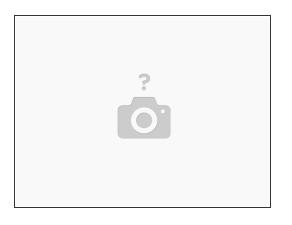

• Turn the computer over and open the display.

## Step 62 — Align the Screw Holes

 Align the screw holes on the hinge caps with the screw holes on the display hinges.

#### Step 63 — Replace the Screws

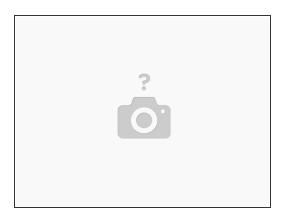

• Replace the screws that secure the hinge caps to the display hinges.

### Step 64 — Prying the Edges

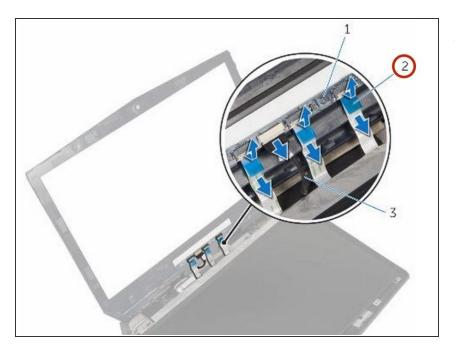

- WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your</u> <u>Computer</u>. After working inside your computer, follow the instructions in <u>After Working Inside Your</u> <u>Computer</u>.
- Using your fingertips, carefully pry up the inside edges of the display bezel.

# Step 65 — Turn it Over

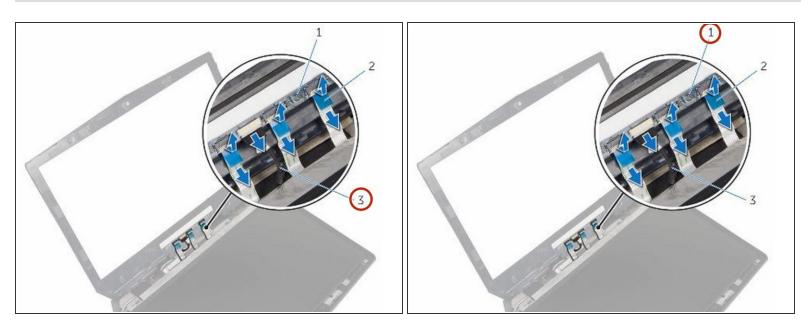

• Carefully lift the display bezel and turn it over.

## Step 66 — Lifting the Latches

 Lift the connector latches and disconnect the display-board cables from the logo board.

#### Step 67 — Disconnect the Logo-Board Cable

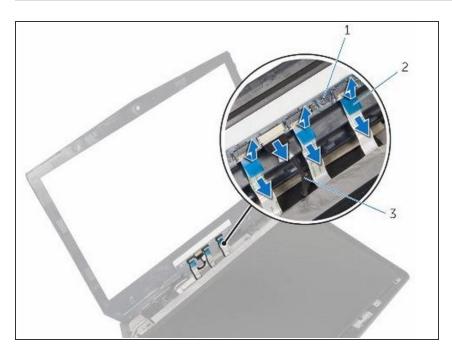

• Disconnect the logo-board cable from the logo board.

# Step 68 — Connect the Logo Board Cable

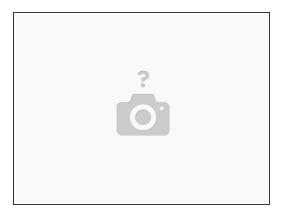

Connect the logo-board cable to the logo board.

### Step 69 — Slide the Display-Board Cables

 Slide the display-board cables to their respective connectors on the logo board and press down the latches to secure the cables.

# Step 70 — Turn the Display Bezel Over

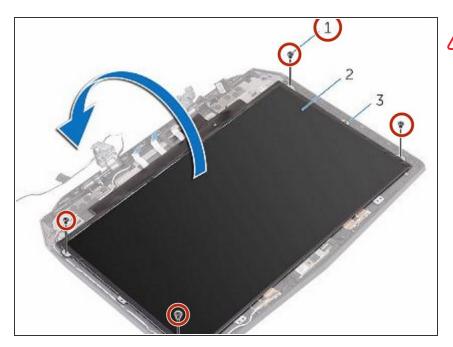

• Turn the display bezel over.

# Step 71 — Align the Bezel

 Align the display bezel with the display back-cover and gently snap the display bezel into place.

#### Step 72 — Remove the Screws

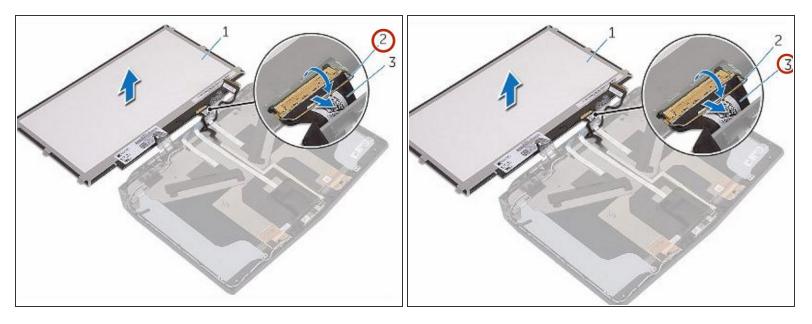

- WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your</u> <u>Computer</u>. After working inside your computer, follow the instructions in <u>After Working Inside Your</u> <u>Computer</u>.
- Remove the screws that secure the display panel to the display backcover.

# Step 73 — Lift the Display Panel

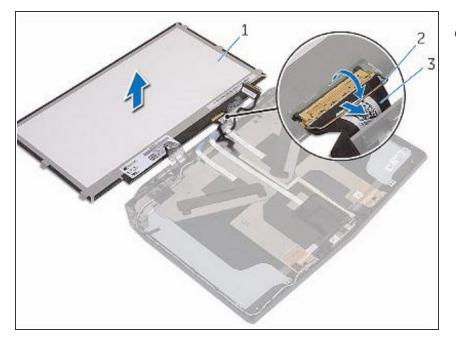

• Gently lift the display panel and turn it over.

# Step 74 — Disconnecting the Display Cable

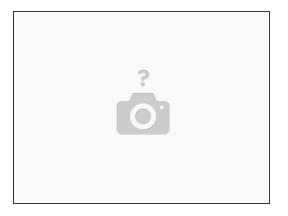

• Lift the connector latch and disconnect the display cable from the display panel.

# Step 75 — Connect the Display Cable

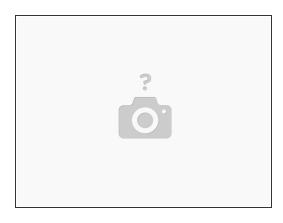

• Connect the **NEW** display cable to the display panel and press down on the connector latch to secure the cable.

# Step 76 — Turn the Display Panel Over

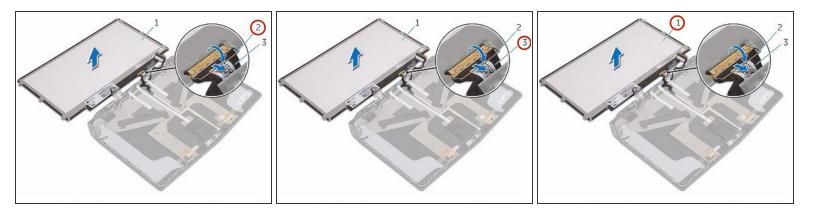

• Turn the display panel over.

# Step 77 — Gently Lift the Display Panel

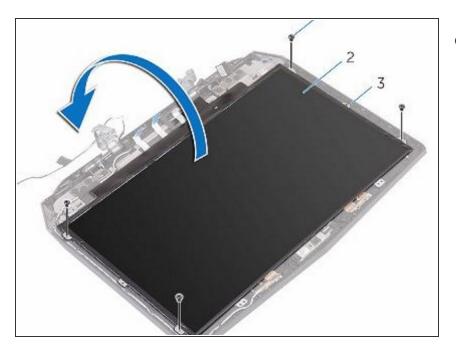

• Gently lift the display panel and turn it over.

# Step 78 — Lifting the Latch

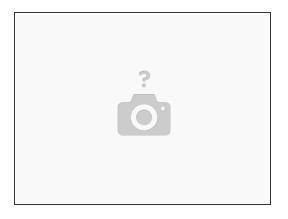

• Lift the connector latch and disconnect the display cable from the display panel.

# Step 79 — Securing the Cable

 Connect the NEW display cable to the display panel and press down on the connector latch to secure the cable.

# Step 80 — Turn the Display Panel Over

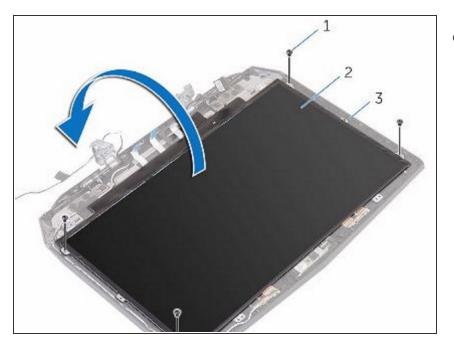

• Turn the display panel over.

# Step 81 — Align the Screw Holes

 Align the screw holes on the display panel with the screw holes on the display back-cover.

#### Step 82 — Replace the Screws

 Replace the screws that secure the display panel to the display backcover.

#### Step 83 — Remove the Screws

- WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your</u> <u>Computer</u>. After working inside your computer, follow the instructions in <u>After Working Inside Your</u> <u>Computer</u>.
  - Remove the screws that secure the display hinges to the display backcover.

# Step 84 — Lift the Display Hinges

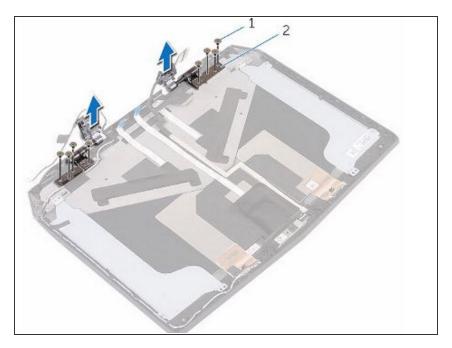

• Lift the display hinges off the display back-cover.

# Step 85 — Align the Screw Holes

 Align the screw holes on the NEW display hinges with the screw holes on the display back-cover.

#### Step 86 — Replace the Screws

 Replace the screws that secure the display hinges to the display backcover.

### Step 87 — Place on a Flat Surface

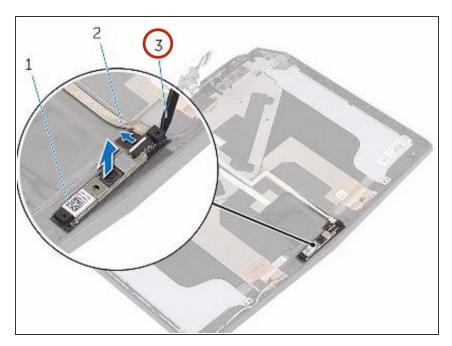

- WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your</u> <u>Computer</u>. After working inside your computer, follow the instructions in <u>After Working Inside Your</u> <u>Computer</u>.
  - Place the display back-cover assembly on a flat surface.

# Step 88 — Disconnect the Camera Cable

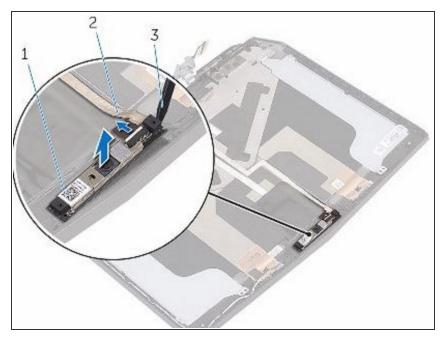

• Disconnect the camera cable from the camera module.

# Step 89 — Prying the Camera Module

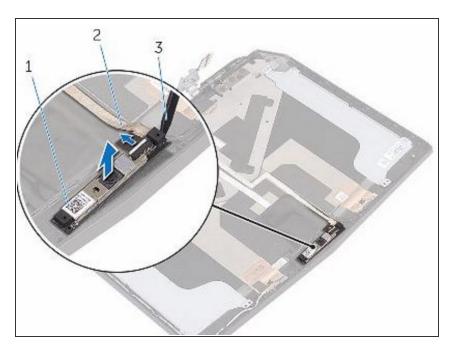

• Using a plastic scribe, pry the camera module off the display back-cover.

#### Step 90 — Place the NEW Camera Module

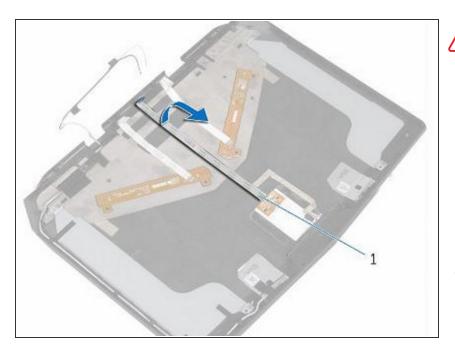

• Using the alignment posts place the **NEW** camera module on the display back-cover and snap it into place.

#### Step 91 — Connect the Camera Cable

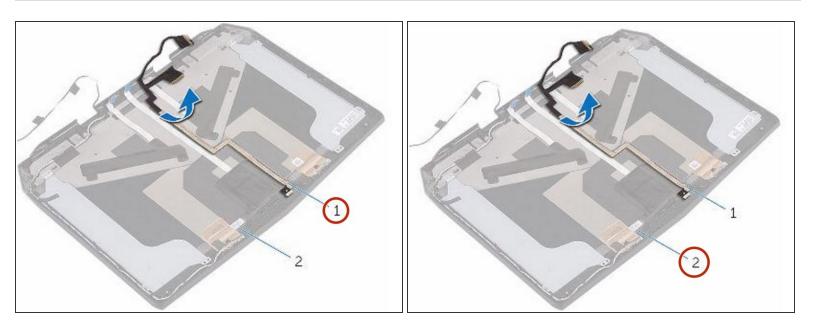

• Connect the camera cable to the camera module.

#### Step 92 — Peel the Display-Board Cable

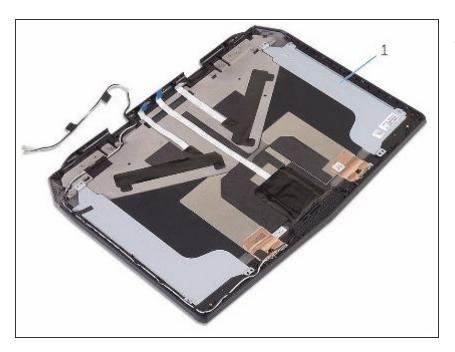

- WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in <u>Before Working Inside Your</u> <u>Computer</u>. After working inside your computer, follow the instructions in <u>After Working Inside Your</u> <u>Computer</u>.
- Peel the display-board cable to access the camera cable.

#### Step 93 — Peel the Camera Cable

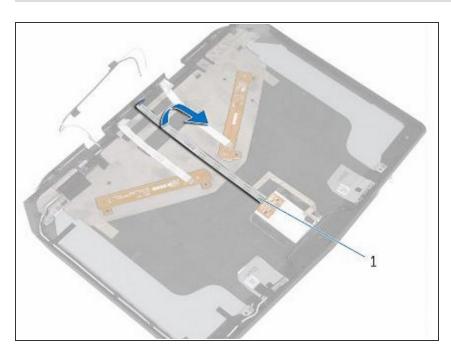

• Note the display cable routing and peel the camera cable off the display back-cover.

#### Step 94 — Place the Display Back-Cover

 Place the display back-cover on a flat surface.

# Step 95 — Adhere the Display-Board Cable

 Adhere the display-board cable and the camera cable to the NEW display back-cover.

To reassemble your device, follow these instructions in reverse order.
