Step 1 — Battery

- Turn the computer off and disconnect if from all power sources.

Step 2
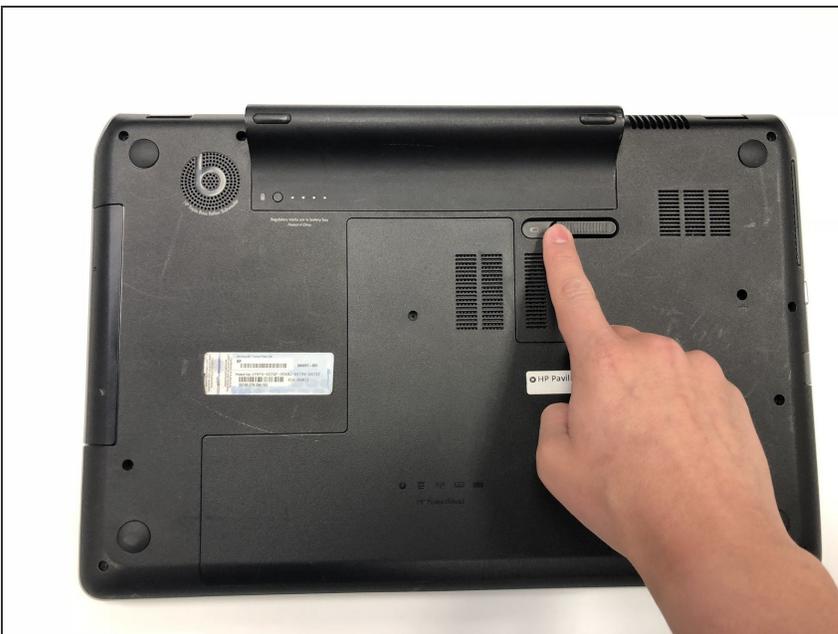

- Slide the battery release switch to the left.

| |

Step 3
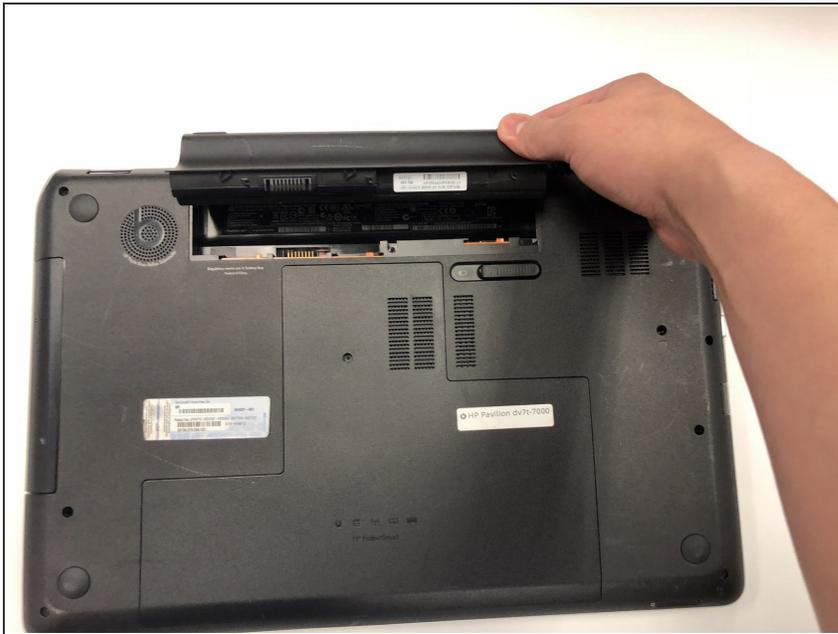

- Hold the release switch all of the way to the left and your other hand to pull the battery out.

Step 4 — Back Panel

- Unscrew the single Phillips #00 screw.
- ⓘ Screw will not come out, it is connected to the panel

Step 5
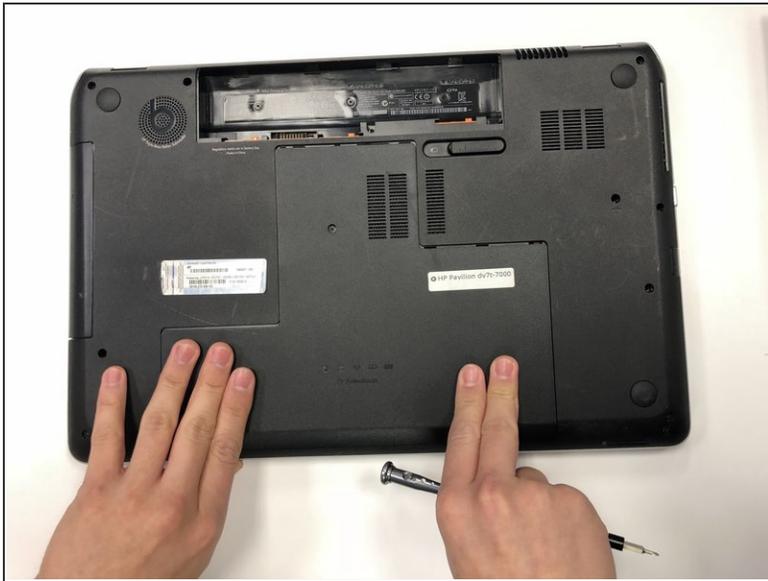

- Remove service hatch by sliding away from the computer and lifting up.

Step 6 — RAM
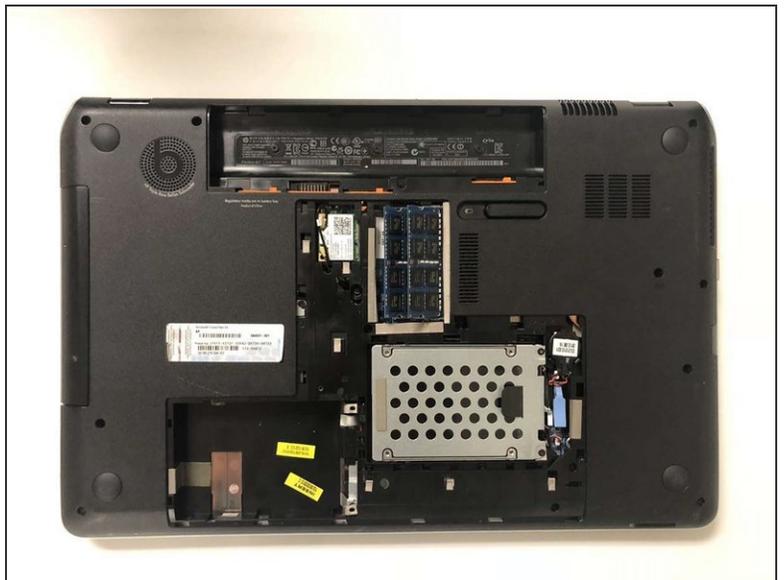

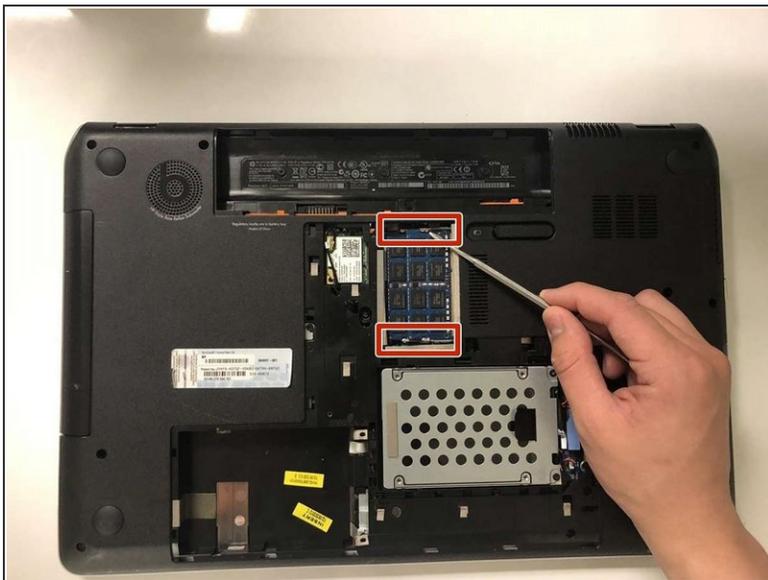

- Push the retraining springs away from the RAM at the same time to unlock the RAM.
