General Electric Telephone 2-9710A Phone Cord Replacement

Use this guide to replace the cord that...

Written By: Norberto Sanchez

INTRODUCTION

Use this guide to replace the cord that connects the handset and the base.

🔧 TOOLS:

[Phillips #1 Screwdriver](#) (1)
[iFixit Opening Tool](#) (1)

Step 1 — Phone Cord

⚠️ Unplug the device before proceeding.

- Using a plastic opening tool, remove the phone cord from the phone jack at the base of the headset.

- ⓘ To release the cable, gently press down on the top plastic tab of the connector.

Step 2
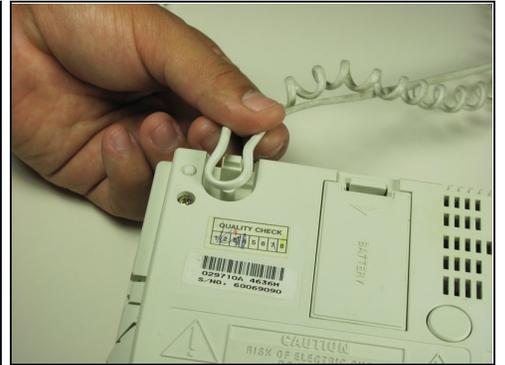

- Remove the 7.5 mm screw.

- Remove the screw cap.

- Pull up the phone cord to remove it from the base.

To reassemble your device, follow these instructions in reverse order.
