Farberware FSTO100 Knob Replacement

Use this guide to replace a missing or broken...

Written By: Tony Wang

INTRODUCTION

Use this guide to replace a missing or broken knob with glue.

🔧 **TOOLS:**

Large Needle Nose Pliers (1)
Polyurethane Glue (1)

Step 1 — Knob

- If a knob falls off, make sure metal tab is still in place.

- If not, insert metal tab into horizontal slot with pliers.

Step 2

- Apply polyurethane glue to the inside of the metal tab.

Step 3

- Attach the knob to the slot in its original position.

⚠ Allow glue to fully dry before using knob.

To reassemble your device, follow these instructions in reverse order.
