🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Spudger (1)

This document was generated on 2020-11-28 06:55:15 AM (MST).

Step 1 — Bottom Cover

- ⓘ Before you begin, be sure to turn off your laptop and unplug it from the outlet.

- Close the display and flip the laptop on its back.

- Loosen the ten 5.0 mm-long Phillips #0 screws.

 - The four screws marked with orange will remain captive to the cover.

Step 2

- Use a spudger to pry up and loosen the back cover.

- Remove the back cover.
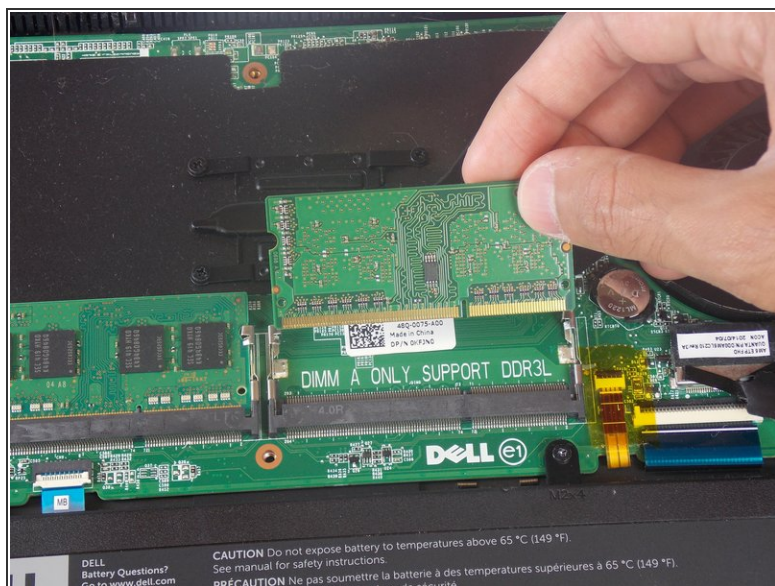

Step 3 — RAM

- Remove the plastic heat spreader that covers the RAM sticks.

Step 4

- Release the clamps on each side of the RAM sticks by pushing away from the center.
  - ⓘ When done properly the RAM stick should pop up.

Step 5

- Pull the RAM stick in a straight line out of the socket.

To reassemble your device, follow these instructions in reverse order.
