Step 1 — Speaker Buttons

- Remove front panel by forcefully placing the flat edge of the spudger in between panel and plastic. Angle spudger and use fingers to pry panel off.

 - (i) You may need to use extra force.

Step 2

- Unscrew all eight 14mm screws closest to the edges of the speaker by spinning a size PH2 screwdriver in a counterclockwise motion.

- Dislodge face by holding speaker face down. Gently shake or tap front against table to fully remove face.

- **OR** grab ahold of the silver tab to pull the speaker face out. This may require force.

Step 3

- Unscrew upper panel two 10 mm screws spinning a size PH2 screwdriver in a counterclockwise motion.

Step 4

- Remove circuit board by pulling straight upwards out of slot.

- Remove plastic buttons by gently pushing buttons from top of speaker and using other hand to pull from bottom.

To reassemble your device, follow these instructions in reverse order.
