# VTech Kidizoom Smartwatch DX2 Motherboard Replacement

How to replace a VTech Kidizoom Smartwatch DX2 motherboard.

Written By: Jessica Richard

INTRODUCTION

In order to remove the screen or the battery, the main board will have to be removed first. Follow this guide to set you on your way.
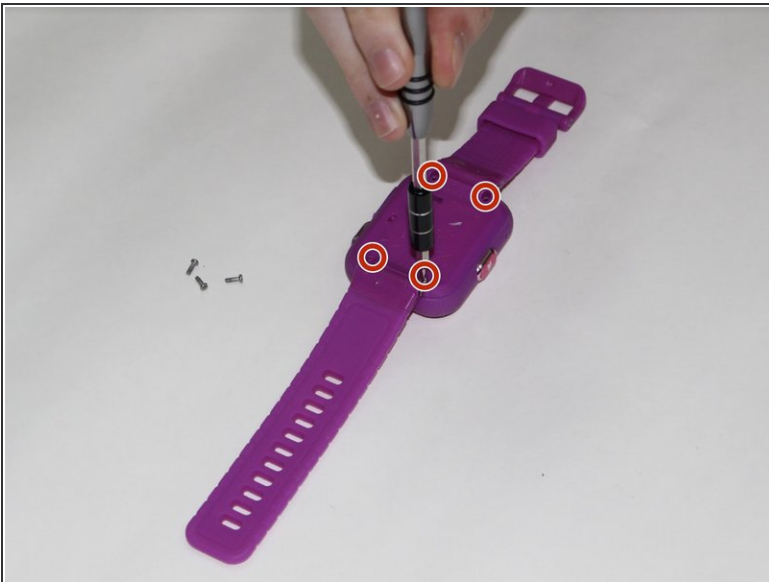

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- Tweezers (1)

Step 1 — Master Switch

- Begin by flipping the watch over with its back facing upwards.

Step 2

- Next, use the Phillips #00 screwdriver to unscrew the four 6.0 mm screws located in each corner of the watch to remove the backplate.

Step 3

- Gently lift the backplate up to remove it.

Step 4

- After removing the backplate, lift the master switch up from the circuit board.
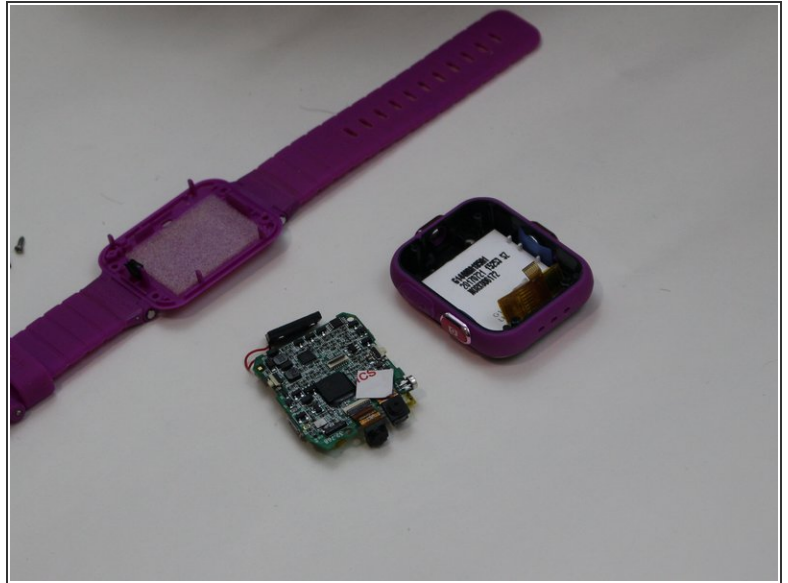

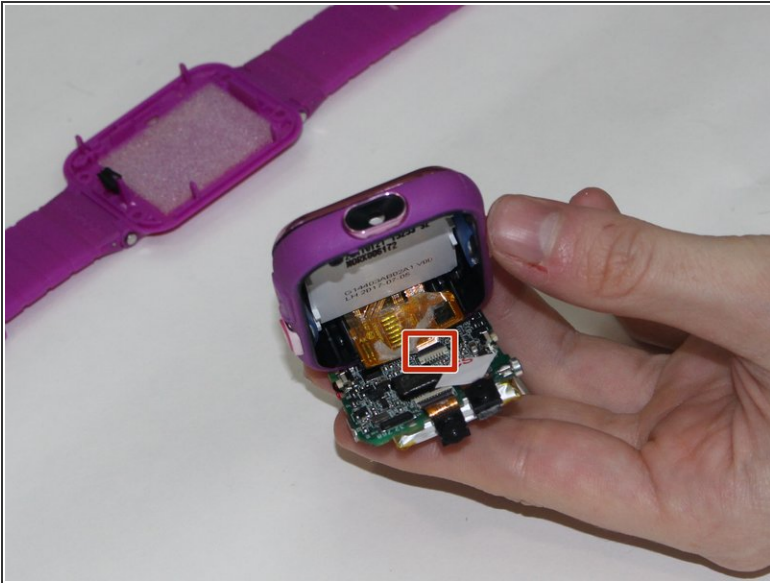

Step 5 — Motherboard

- Using a Phillips #00 screwdriver, remove the 0.6 mm screw.

Step 6

- Carefully remove the speaker from the case without disconnecting it from the motherboard.

Step 7

- Using the tweezers, carefully lift the bar holding the connection to the screen.

- Remove the motherboard from the device.

To reassemble your device, follow these instructions in reverse order.
