

Hover-1 Matrix Battery Replacement

This replacement guide will give comprehensive steps on how to replace the battery for Hover-1 Matrix hover board, including pictures and descriptions.

Written By: Ziru Mo

INTRODUCTION

Hoverboards were a thing of science-fiction, but since introduced in 2013 they became a sensation. The battery is a major component in providing electricity to the hoverboard. When the battery gets damaged it is not that difficult to replace it in order to keep the board running.

TOOLS:

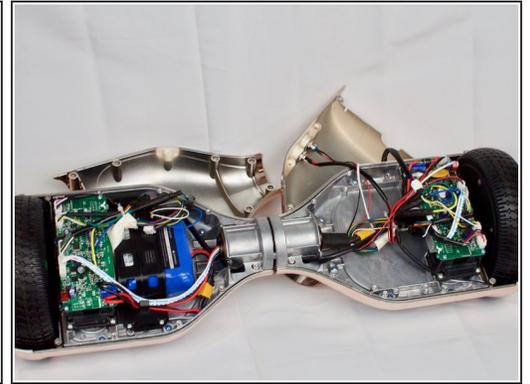

- [Pro Tech Toolkit](#) (1)

PARTS:

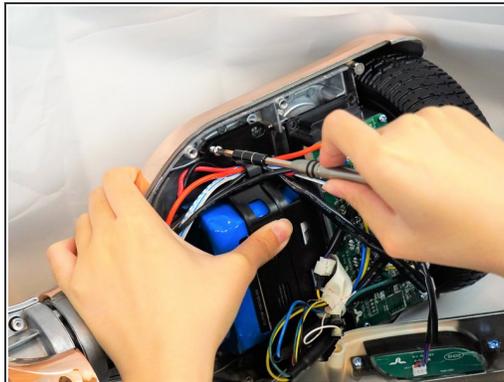

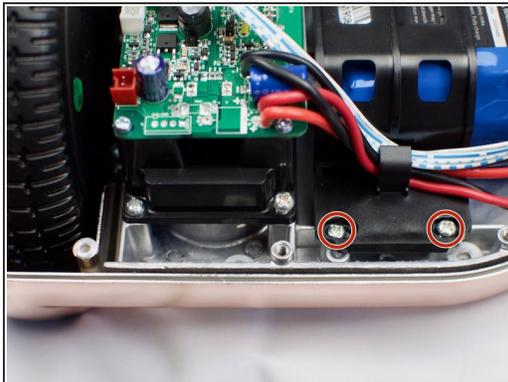

- [Hover-1 Matrix Battery](#) (1)

Step 1 — Battery

- Remove the twenty screws from the top outer cover using a Phillips #1 screwdriver.
- Lift the left and right sides of the outer cover away from the rest of the hoverboard.

Step 2

- Remove the screws from the battery cover using a Phillips #1 screwdriver.

Step 3

- Move the plastic cover from the top of the battery.
- Unplug the cables that connect to the battery and remove the battery from the hoverboard.

To reassemble the device, follow these instructions in reverse order.
