

HP Pavilion dm1z-3000 Cooling Fan Replacement

This guide will show you how to replace the cooling fan for the HP Pavilion dm1z

Written By: John Morillas

INTRODUCTION

The cooling fan helps ventilate the device ensuring it does not overheat.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
-

Step 1 — Cooling Fan

- Shut down the computer.
- Disconnect all external devices and cables from the compute.

Step 2

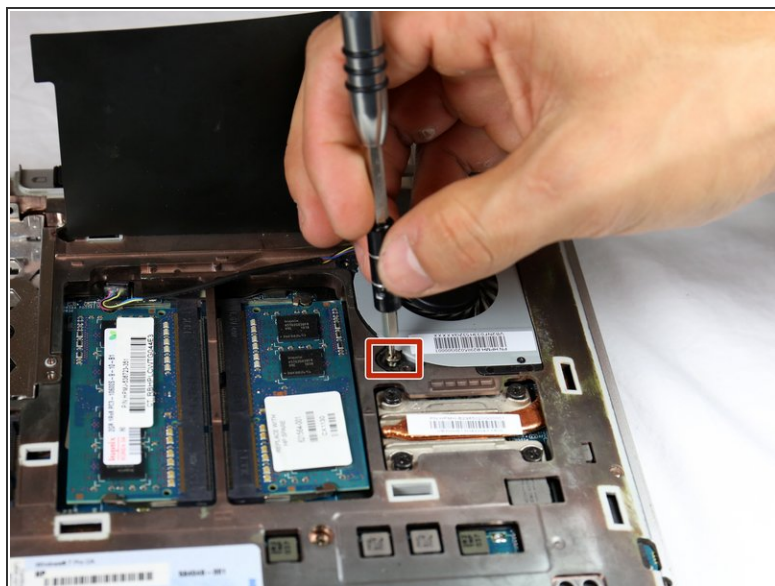

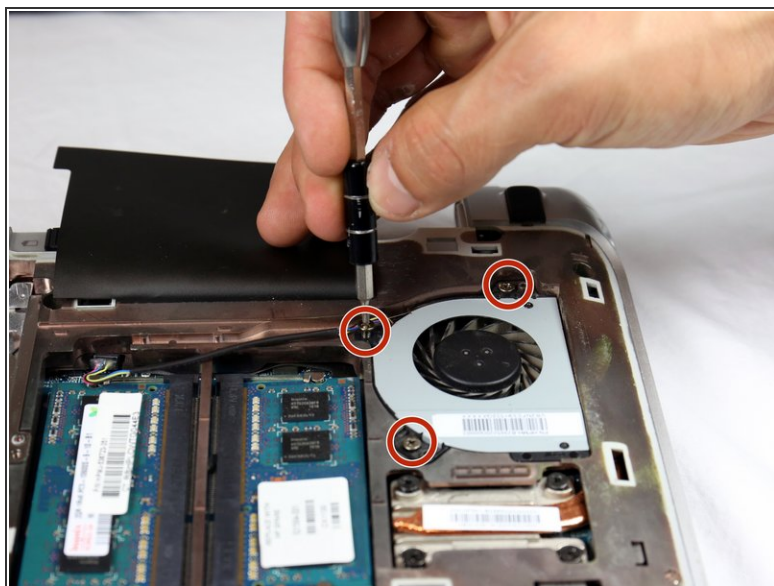

- Find the black sliding tab next to where the battery is located.
- Slide the black tab until you hear a click.
- Gently remove the battery.

Step 3

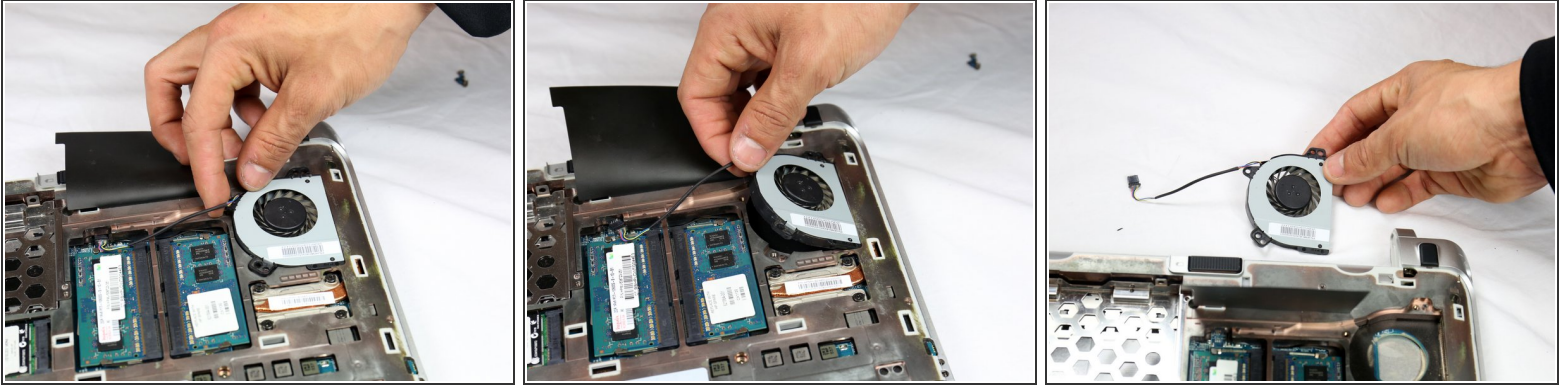

- Gently lift the back panel of the laptop from where the battery was located.

Step 4

- Remove the three screws with a #00 Phillips screwdriver.

Step 5

- Once the screws have been taken out gently lift up the fan and remove it from the device.

To reassemble your device, follow these instructions in reverse order.
