INTRODUCTION

Follow these steps to remove the back plate from your Ibanez 5 String Bass Model SR405QM guitar. This is useful if you need to access the output jack, the potentiometer, or the tremolo system. A Phillips #2 screwdriver is required to remove the screws on the backplate.

TOOLS:

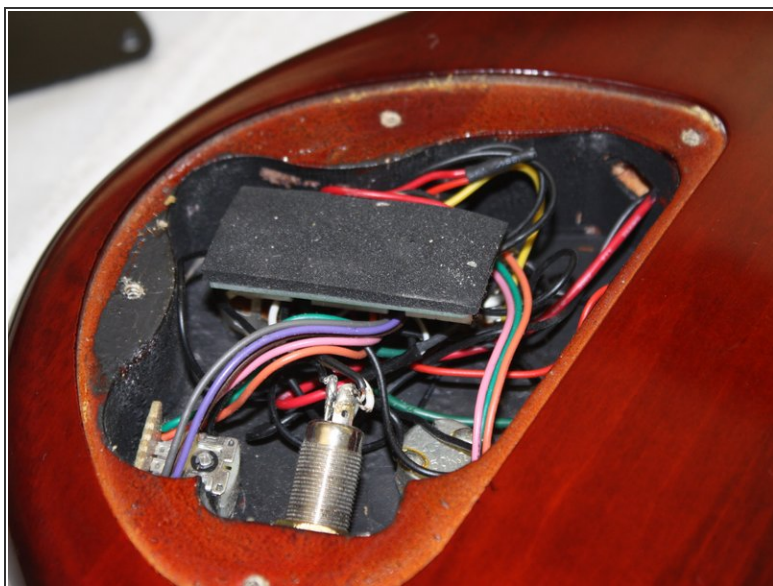

- [Phillips #2 Screwdriver](#) (1)
-

Step 1 — Backplate

- Use a Phillips #2 screwdriver to remove the four screws on the backplate.

Step 2

- Remove the cap by lifting upwards, revealing the circuitry of the instrument.

To reassemble your device, follow these instructions in reverse order.
