

How to install Windows 10 over USB

Written By: guardian10

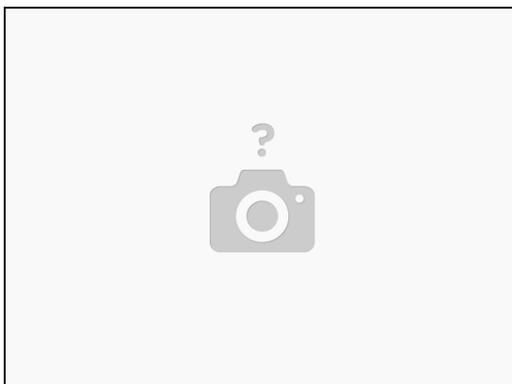

Step 1 — Downloading the ISO

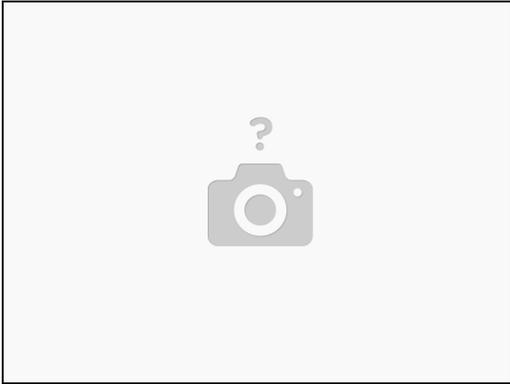

- Go to <https://www.microsoft.com/en-us/software...> and download the media creation tool.

Step 2 — Running the tool

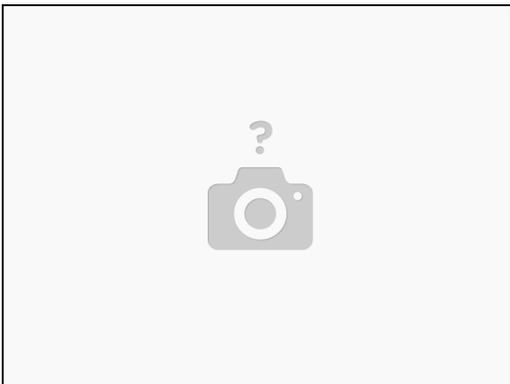

- Run the tool you just downloaded and follow on-screen prompts.
- Select the USB drive you want and create media.

Step 3 — Starting installation

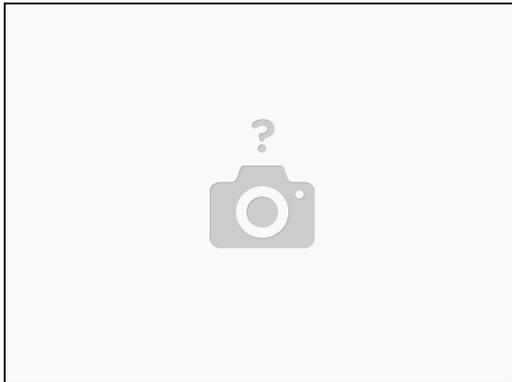

- Start up the computer you want to install Windows 10 on.
- Boot to the Windows install USB you created earlier.

Step 4 — Almost there

- Follow on-screen prompts. When you get to the install destination screen, you may have to format the drive.

Step 5 — You're done!

- Wait for Windows to install, and you're done!
-

Your finished!
