

iPhone 14 Pro Max Pentalobe Screw Replacement

Remove or replace the two pentalobe screws securing the display in the iPhone 13 Pro Max.

Written By: Dominik Schnabelrauch

INTRODUCTION

Use this guide to remove or replace the two screws securing the iPhone 14 Pro Max display panel.

This guide was created using the **A2894** (international) model.

Pentalobe (five-point) screws are a proprietary Apple design, requiring the use of a specialized P2 screwdriver.

TOOLS:

- [P2 Pentalobe Screwdriver iPhone](#) (1)

Step 1 — Remove the pentalobe screws

- Power off your iPhone before beginning disassembly.
- Remove the two 6.8 mm-long pentalobe P2 screws at the bottom edge of the iPhone.

To reassemble your device, follow these instructions in reverse order.
