

Samsung Galaxy Note II Rear Facing Camera Assembly Replacement

Use this guide to replace the rear-facing...

Written By: Sam Goldheart

INTRODUCTION

Use this guide to replace the rear-facing camera assembly in your Samsung Galaxy Note II.

TOOLS:

[iFixit Opening Tool](#) (1)
[Phillips #00 Screwdriver](#) (1)
[Spudger](#) (1)
[Tweezers](#) (1)

PARTS:

[Galaxy S III and Note II Rear Camera](#) (1)

Step 1 — Stylus

- Grasp the end of the stylus and remove it from its slot in the midframe.

Step 2 — Rear Case

- Pry with a plastic opening tool, or your fingernail, in the divot to the left of the rear-facing camera, near the power button.

Step 3

- Lift the rear case by the corner nearest the divot and remove it from the phone.

Step 4 — MicroSD Card

- If you have an SD card inserted, use the flat end of a spudger, or your fingernail, to press the microSD card slightly deeper into its slot until you hear a click.
 - After the click, release the card and it will pop out of its slot.
 - Remove the microSD card.
- ☒ For reassembly, push the microSD card into the slot until it clicks in place.

Step 5 — Battery

- Insert a plastic opening tool, or your finger, into the notch of the battery compartment and lift the battery upward.

Step 6

- Remove the battery from the midframe.

Step 7 — Midframe

- Remove the eleven 4.0 mm Phillips #00 screws securing the midframe to the display assembly.

Step 8

- Insert your plastic opening tool between the midframe and front panel assembly on the side of the phone.
- Slide the plastic opening tool down the seam.

Step 9

- Continue to run the plastic opening tool down the seam.

Step 10

- Carefully pry around the corner with a plastic opening tool.

Step 11

- Pry along the top of the phone with a plastic opening tool.

Step 12

- Push the plastic opening tool down to free the corner of the midframe from the display assembly.

Step 13

- Free the clips along the power button side of the phone.
- Lastly, free the two clips along the top and bottom edge of battery compartment.

Step 14

- Lift the display assembly out of the midframe.

Step 15 — Motherboard Assembly

- Use a spudger to disconnect the vibrator/power button assembly cable connector.
- Disconnect the antenna cable connector.
- Disconnect the display cable connector.

Step 16

- Disconnect the front-facing camera cable connector.
- Disconnect the headphone jack cable connector.
- Disconnect the digitizer cable connector.

Step 17

- Use the spudger to disconnect the antenna cable connector from the motherboard.
- Disconnect the soft button cable connector.
- Disconnect the USB board cable connector.

Step 18

- Remove the 3 mm Phillips #00 screw securing the motherboard to the display assembly.

Step 19

- Gently remove the motherboard.

⚠ Hold the motherboard by its edges to prevent ESD damage. Be careful not to snag it on any cables as you extract it from the display assembly.

Step 20 — Rear Facing Camera Assembly

- Use a spudger to disconnect the rear-facing camera assembly cable connector.

Step 21

- Use [tweezers](#), or your fingers, to remove the rear-facing camera assembly.

To reassemble your device, follow these instructions in reverse order.
