## Step 1 — Lower Case

- Remove the eight 4 mm Phillips screws securing the lower case to the MacBook.

## Step 2

- ⚠️ The lower case is constructed of rubber-coated aluminum. Do not excessively bend the aluminum during removal, as any permanent deformation will cause tolerance issues after reassembly.

- Slightly lift the lower case near the vent opening.

- Continue running your fingers between the lower and upper cases until the upper case pops off its retaining clips.

- ⓘ The location of these three clips is shown in the third picture.

## Step 3 — Battery

⚠ For precautionary purposes, we advise that you disconnect the battery connector from the logic board to avoid any electrical discharge. This step is **optional** and is not required.

● Use the flat end of a spudger to lift the battery connector up out of its socket on the logic board.

ⓘ It may be easier to use your fingernails to lift up on both sides of the connector.

## Step 4 — AirPort/Bluetooth Cable

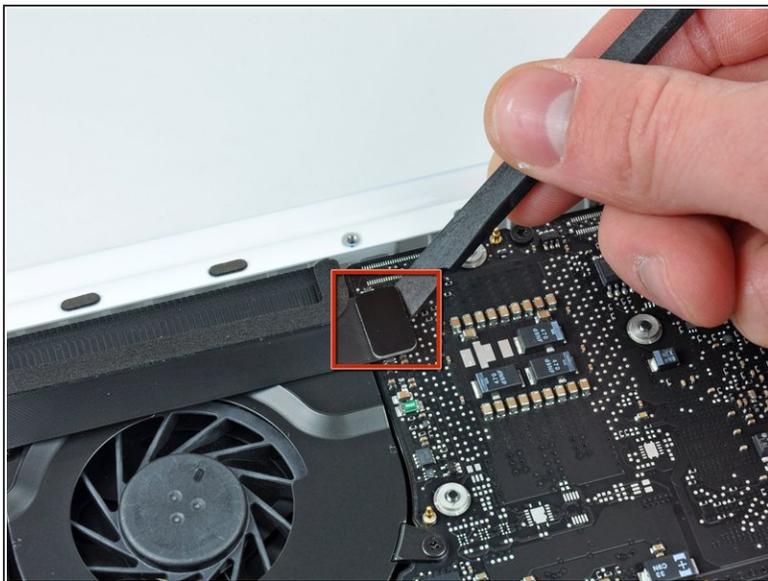

● Use the flat end of a spudger to pry the AirPort/Bluetooth cable connector up off the logic board.

● Carefully peel the AirPort/Bluetooth ribbon cable from its channel within the rear speaker assembly.

**Step 5**

- Use the flat end of a spudger to pry the AirPort/Bluetooth cable connector up off the right speaker.

To reassemble your device, follow these instructions in reverse order.
