

# Oster 6329 Circuit Board Resistor Replacement

This guide will show you how to replace a damaged component on the toasters circuit board.

Written By: Timothy Grijalva

---

## INTRODUCTION

This guide requires that you know how to solder components and identify which component needs to be replaced.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [Soldering Workstation](#) (1)
-

## Step 1 — Outer Shell Removal

- Using the Phillips-head #2 screwdriver, unscrew the three 1cm Phillips-head screws on the plastic base of the toaster to separate the outer metal shell from the plastic base.

## Step 2

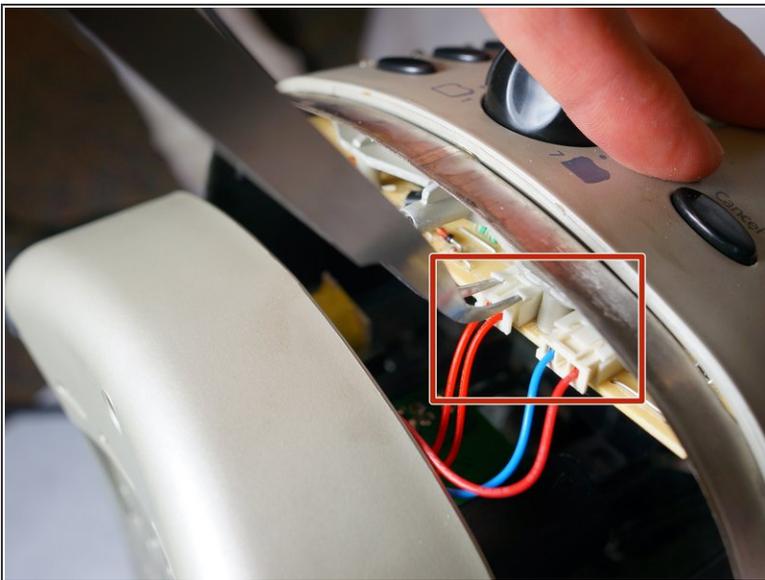

- Push the plastic push-down handle down and pull the plastic handle straight from metal arm.

### Step 3

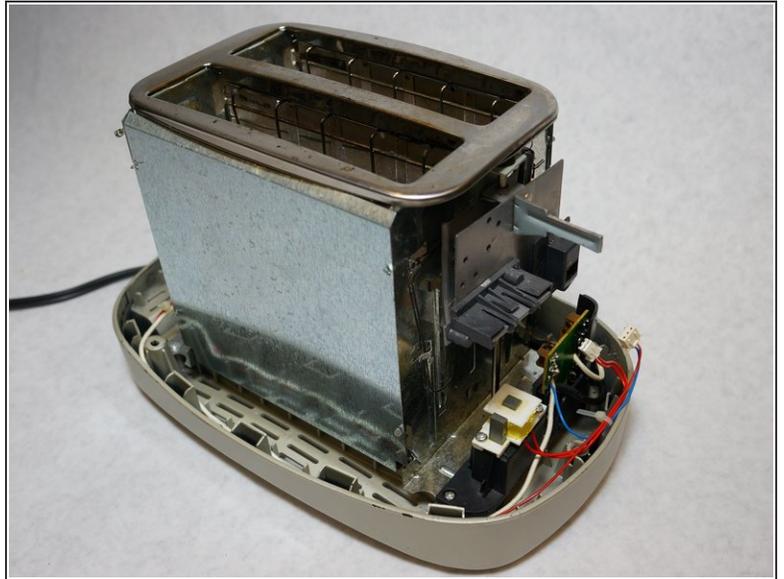

- Loosen the outer metal shell from the plastic base by holding the plastic base while pulling up on the metal shell.
- ⓘ Only lift the outer shell a little so as not to disconnect the cables that connect the circuit board.

### Step 4

- Disconnect the cable clips from the circuit board using the tweezers to free the outer metal shell from the plastic base.

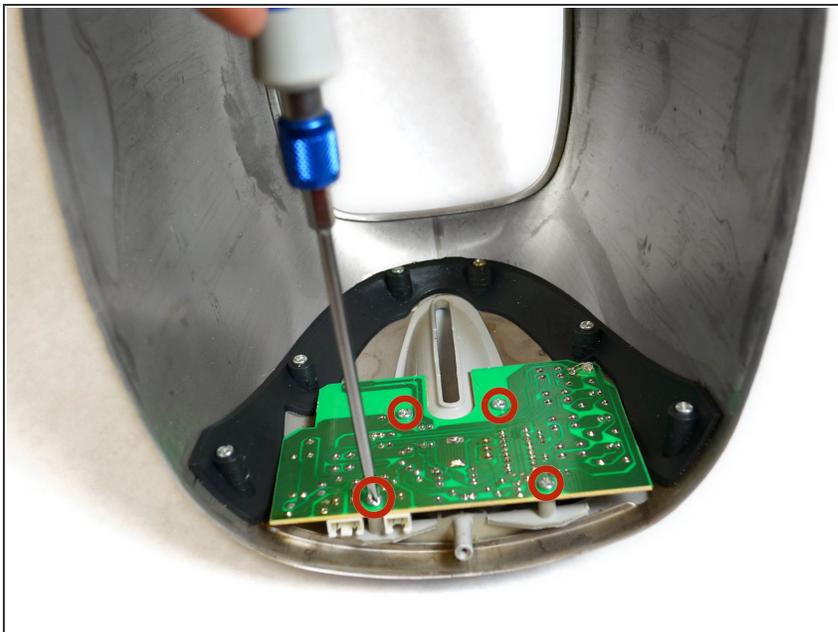

## Step 5

- Lift the top outer metal shell.

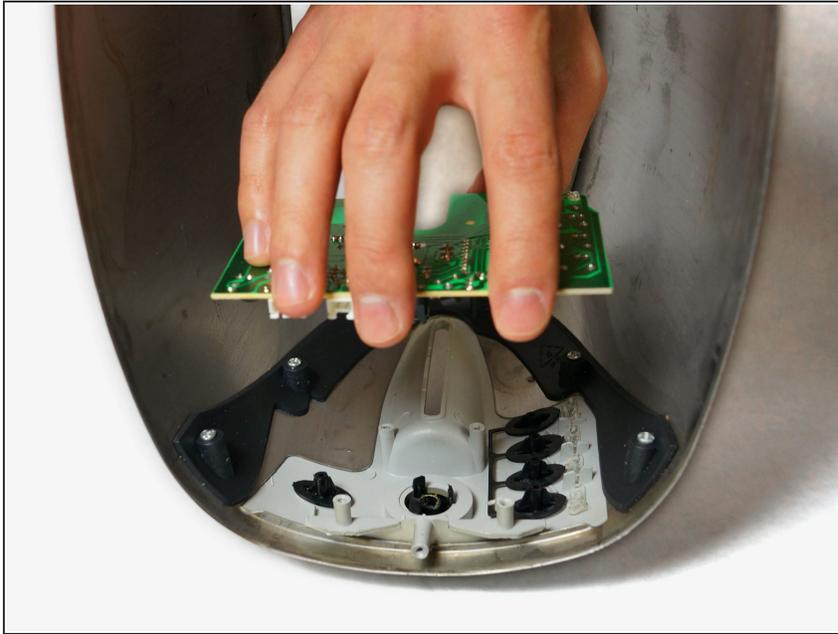

⚠ Carefully lift the outer metal shell at an angle so as not to damage the components in the front of the toaster.

## Step 6 — Circuit Board Resistor

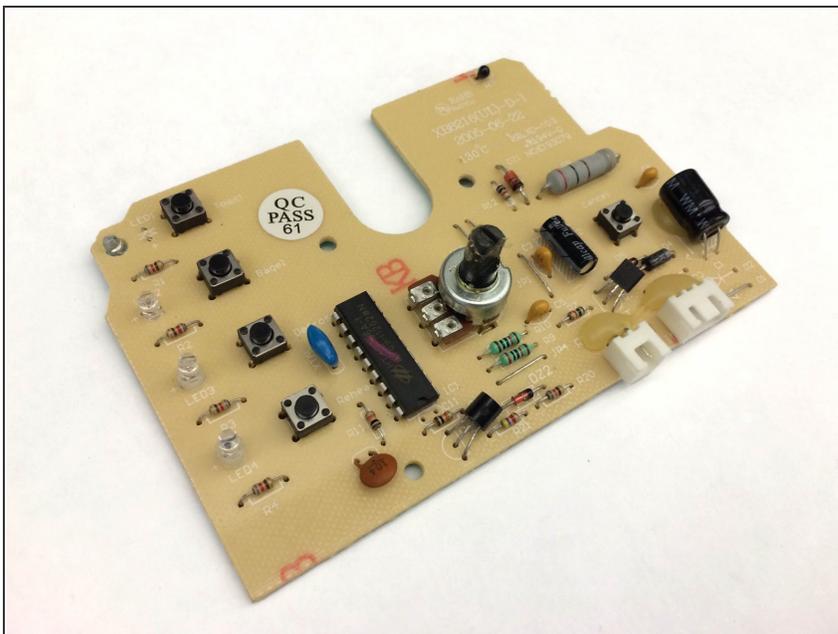

- Using a #1 Phillips head screwdriver, remove the four 1cm Phillips head screws holding the circuit board to the inside of the toaster shell.

## Step 7

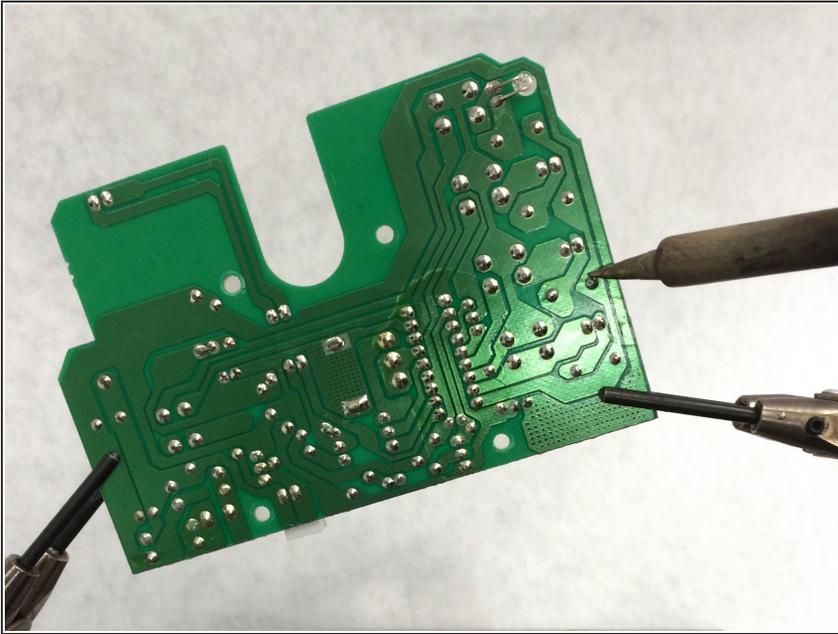

- Grasp the circuit board and pull on it perpendicular to the attached surface.

## Step 8

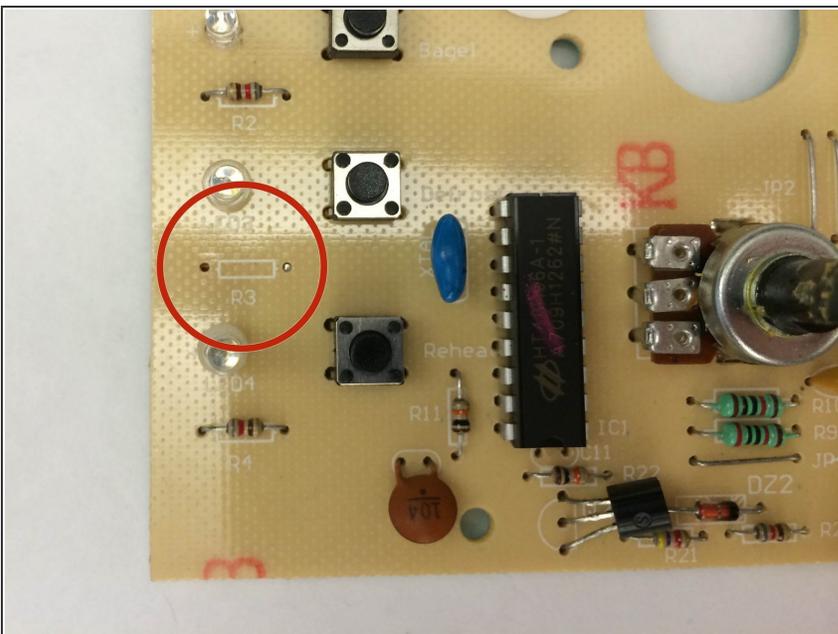

- Inspect the circuit board for any burnt or otherwise damaged components. Be sure to carefully identify the damaged components that need replacement. For help identifying resistor values look at [wikipedia's electronic color code article](#).

## Step 9

- Use the soldering kit to unsolder the damaged component. For soldering Instructions look at the [iFixit Soldering Guide](#).

## Step 10

- Once the damaged component has been unsoldered from the circuit board, remove it.

To reassemble your device, follow these instructions in reverse order.
