INTRODUCTION

The guide will show you how to remove the device back plate.

🔧 TOOLS:

- Phillips #1 Screwdriver (1)
- iFixit Opening Tools (1)

Step 1 — Battery

- Ensure the device is powered down and unplugged.

- Turn the device upside down with the battery compartment facing you.

- Slide the black slider to the right and lift the battery out of its compartment.

Step 2 — Back Plate

- Locate and remove the six Phillips PM2.5×7.0 screws around the perimeter of the back plate.
  - ⓘ These screws do not completely detach from the device when unscrewed.

Step 3

- Use the plastic opening tool to lift up the back plate and set it aside.

To reassemble your device, follow these instructions in reverse order.
