INTRODUCTION

This guide will demonstrate how to dismantle and replace components of your computers display (screen).

🔧 TOOLS:

- Phillips #1 Screwdriver (1)
- Phillips #00 Screwdriver (1)
- iFixit Opening Tool (1)

This document was generated on 2022-05-29 08:23:58 AM (MST).

Step 1 — Keyboard

- Carefully use the blue iFixit Opening Tool to pry the panel above the keyboard from the left and right side.

- Push back the screen until it is flat with the laptop.

- Gently remove the clips that connect the panel to the screen.
Step 2

- Use the Phillips #1 screwdriver to remove the two screws.

- Gently pry the keyboard from the laptop using the blue iFixit opening tool.

- Slowly lift the keyboard away from the laptop.
 - Remove the ribbon that connects to the laptop.

⚠ Ensure you remove the keyboard slowly to avoid damaging the ribbon cable.

Step 3 — Display

- Remove the 2-3 pieces of black electrical tape covering the black-and-white antenna cable.

- Close the display, flip the laptop over, and disconnect the black-and-white antenna cables from the Wi-Fi card.
- Flip the laptop back over and open the display.

Step 4

- Remove the two Phillips #1 screws securing the display hinges.

- (i) It is recommended to keep the screws in a small cup so that you don't lose them.

- Remove the four Phillips #1 screws on the back of the laptop.

Step 5

- Gently pull up on the display's video connector to remove it.

- Remove the black-and-white antenna cable from the groove.

- Your display can now be removed.

To reassemble your device, follow these instructions in reverse order.
