# INTRODUCTION

## Step-by-step Instruction Guide

Olympus D590 Camera Backplate Removal. Prerequisite guides for replacing microphone, speaker, LCD screen, and lens.

---

### TOOLS:

- [Phillips #00 Screwdriver](#) (1)
  - [Flathead 3/32" or 2.5 mm Screwdriver](#) (1)
  - [iFixit Opening Tool](#) (1)
-

## Step 1 — Face Plate

- Remove five baseplate screws using a Phillips #00 screwdriver.

## Step 2

- Press and slide the battery cover retainer clip to the left. Use tweezers to lift the battery cover away.

### Step 3

- Remove the single screw from the battery housing using a Phillips #00 screwdriver.

### Step 4

- Using tweezers, lift the rubber plate to expose the ports.

## Step 5

- Remove two screws from the ports using a Phillips #00 screwdriver.

## Step 6

- Use a spudger to pry the faceplate away from the rest of the camera.

## Step 7

- To avoid disconnection of the connector line to the motherboard, use caution when pulling faceplate away from camera case.

**⚠** Damage to the connector line will prevent the on/off power switch's operational function.

## Step 8 — Backplate

- Using a Phillips #00 screwdriver, remove three screws fastened to the camera backplate edge.

## Step 9

- Using a Phillips #00 screwdriver, remove the two camera flash screws secured to either side of bulb housing component.

## Step 10

- Using an iFixit opening tool, pry the backplate from the camera internal housing component.

## Step 11

- Pull the backplate away from the camera internal housing component.

To reassemble your device, follow these instructions in reverse order.
