

Motorola V276 Ear speaker replacement

Written By: Kyle Klitzner

INTRODUCTION

A guide for replacing or inspecting the Motorola V276 ear speaker

TOOLS:

- [Spudger](#) (1)
 - [T6 Torx Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
-

Step 1 — ear speaker

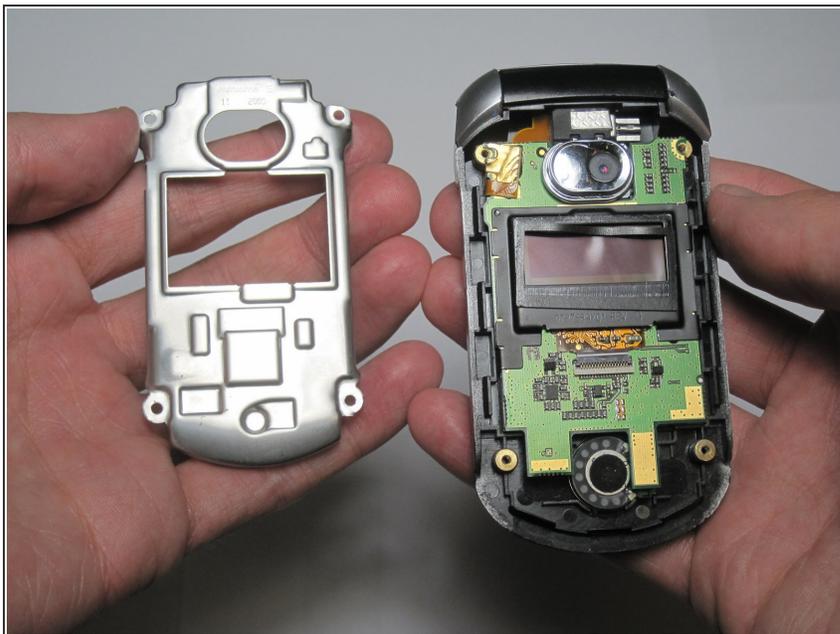

- Place a plastic opening tool in the small crack that runs along the side of the front case to pry it off.

Step 2

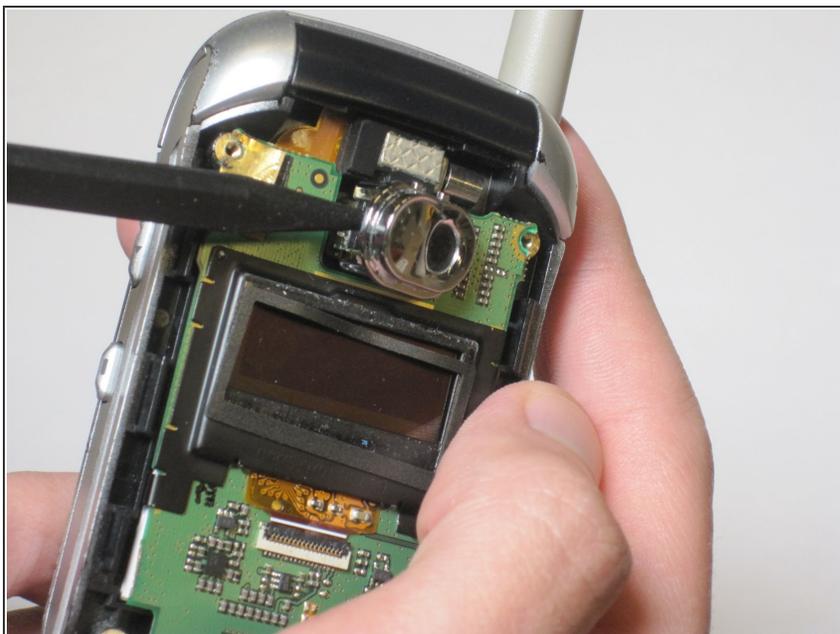

- Use a T6 Torx Screwdriver to remove all 4 small screws.

Step 3

- Remove the midframe from phone.

Step 4

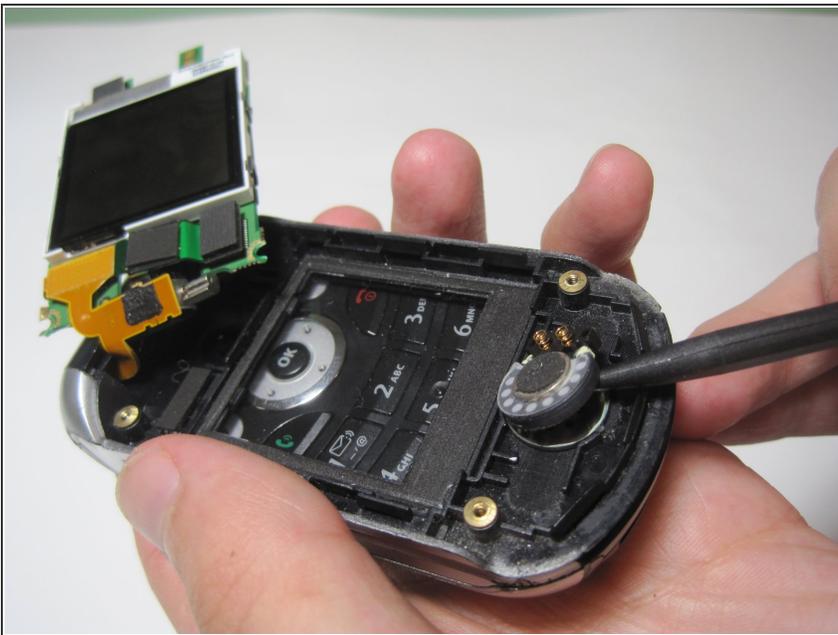

- Use a spudger to remove the plastic camera casing.

Step 5

- Gently lift the LCD away from the frame.

Step 6

- Use your hands or a spudger to remove the ear speaker.

To reassemble your device, follow these instructions in reverse order.
