

Xiaomi Redmi 2 PCB Circuit Board Replacement

Remove the PCB circuit board in a Xiaomi Redmi 2.

Written By: Alicia Brenner

INTRODUCTION

Use this guide to remove the PCB circuit board in your Xiaomi Redmi 2 for repair or replacement.

TOOLS:

- [Phillips #000 Screwdriver](#) (1)
 - [Spudger](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Motherboard

- Use the flat end of the spudger to remove the back panel from the mid-frame and front body.

Step 2

- Insert your finger into the curved opening of the mid-frame.
- Lift the battery and remove.

Step 3

- ❗ Remove the SIM and/or memory cards if present.
- Remove twelve 3.4 mm Phillips #000 screws securing the mid-frame to the front body.

Step 4

- Slide the spudger between the mid-frame and front body, gradually prying the two bodies apart as you slide the spudger around the perimeter of the phone.

Step 5

- Remove the 3.4 mm Phillips #000 screw that holds the motherboard to the front body.
- ⚠ Keep this screw separate from the initial twelve.

Step 6

- Using one prong of the tweezers, pry back the brown clip located on top of the LCD ribbon connector.

Step 7

- Using one prong of the tweezers, pry the ribbon clip away from the motherboard.

Step 8

- Lift and hinge the motherboard with your fingers.

Step 9

- Using one prong of the tweezers, lift and pry back the metal clip positioned over the front proximity sensor ribbon connector.

Step 10

- Using the tweezers, pull the antenna connector from the motherboard.

Step 11

- Lift the motherboard out of the front cover and set aside.

Step 12 — PCB Circuit Board

- Remove the 2.9 mm Phillips #000 screw that holds the PCB circuit board to the screen assembly.

Step 13

- Using the tweezers, lift the antenna connector from the PCB circuit board.

Step 14

⚠ Do not remove the PCB circuit board at this time.

- Using the nylon or metal spudger, gently pry back the top of the PCB circuit board from the screen assembly.

Step 15

- Using the nylon or metal spudger, pry back the silver clip covering the ribbon connector.

Step 16

- Carefully lift the PCB circuit board from the screen assembly and set aside.
- The screen assembly is pictured to the left of the circuit board and is now ready for repair or replacement.

To reassemble your device, follow these instructions in reverse order.
