INTRODUCTION

We are going to teach you how to take apart and put back together a Cannon Powershot N.

🔧 **TOOLS:**

- Spudger (1)
- Phillips #000 Screwdriver (1)

Step 1 — Canon PowerShot N Teardown

- Locate battery housing cover.

Step 2

- Place finger on the textured portion of battery housing cover and slide cover in the direction indicated.

This document was generated on 2020-11-16 07:50:32 PM (MST).

Step 3

- Find beige tab and push it away from the battery.

Step 4

- Remove battery from battery slot with fingers.

This document was generated on 2020-11-16 07:50:32 PM (MST).

Step 5
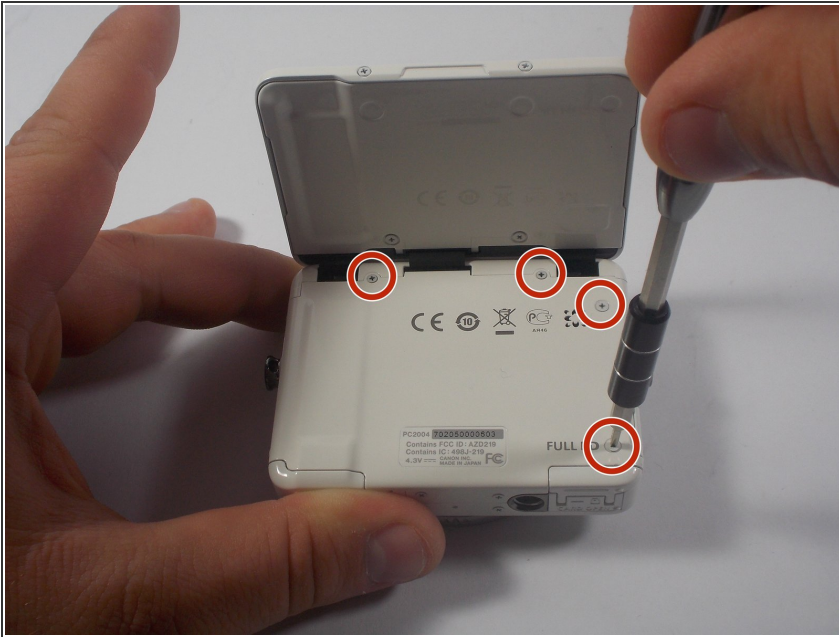

- Using a PH000 size screwdriver, unscrew four screws beneath screen.

Step 6

- Remove 2 screws on the bottom of the camera.

Step 7

- Remove 2 screws from the side of the camera with the on and off buttons.

Step 8
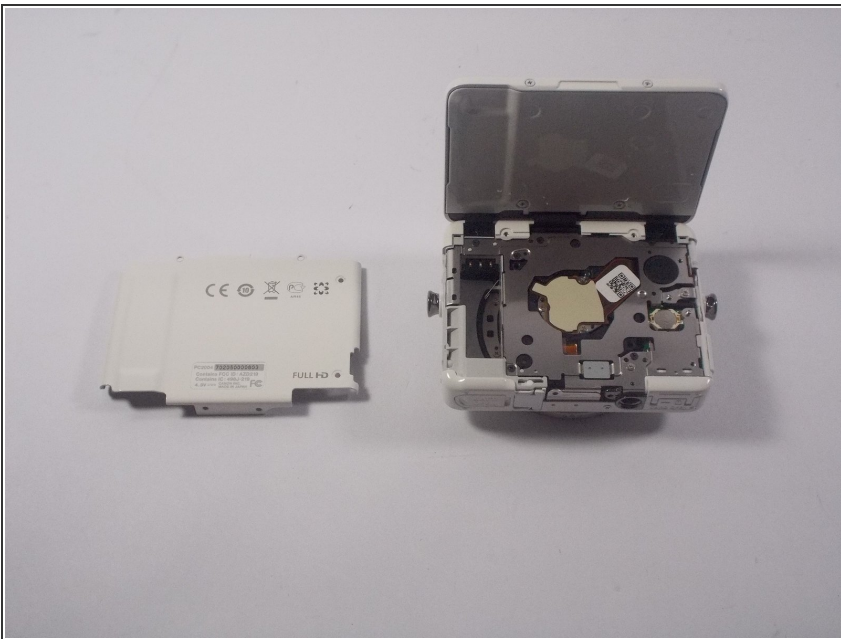

- Remove the back plate.

Step 9

- Locate 2 screws on "on/off" side of the camera and unscrew them.

Step 10

- Locate 2 screws on the other side of the camera and remove them.
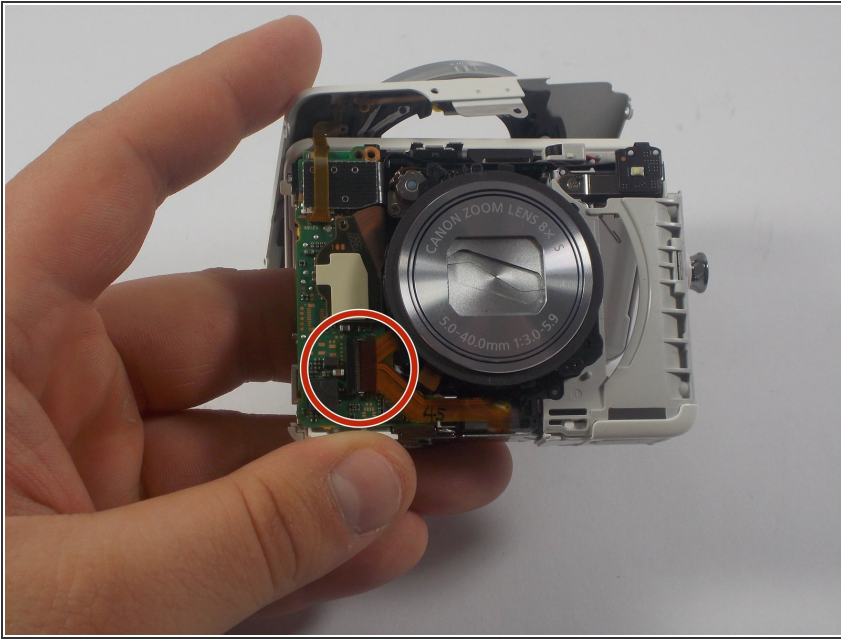

Step 11

- Remove one screw from the bottom of the camera.

Step 12
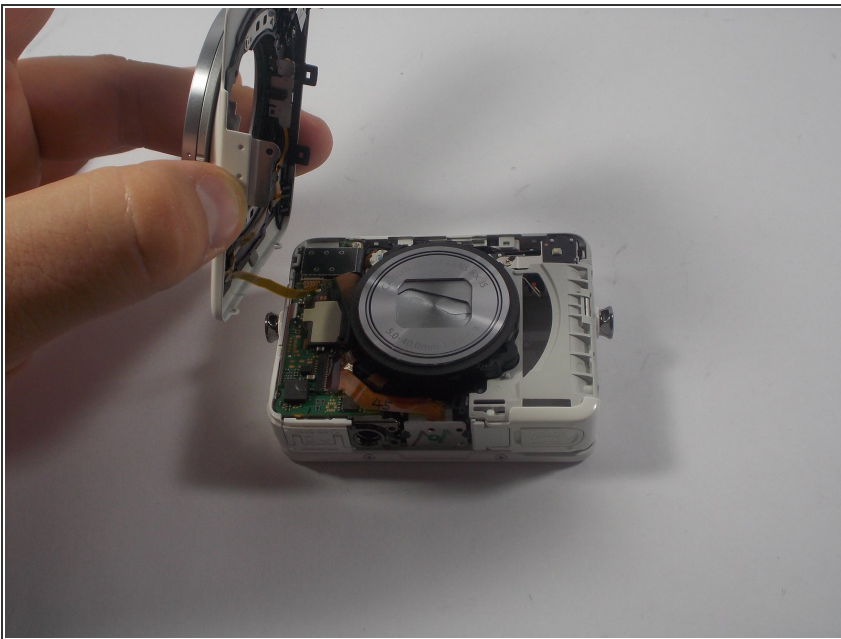

- Remove front plate from motherboard so that one ribbon cable is exposed.

Step 13

- Locate the second ribbon cable.
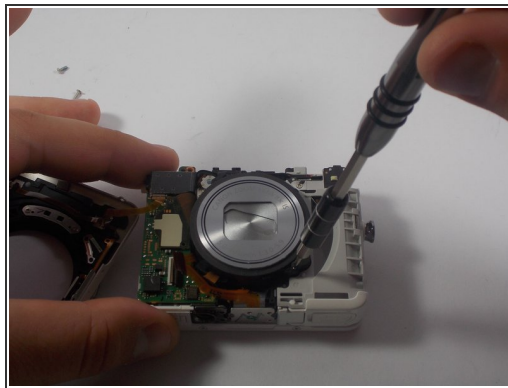

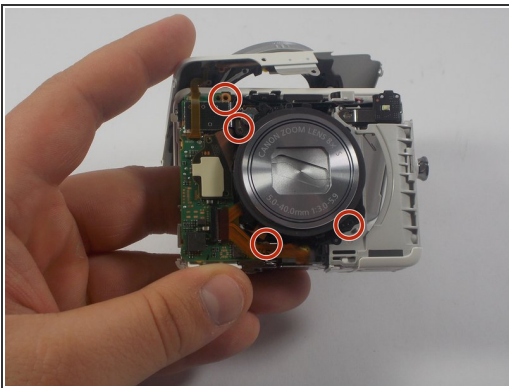

Step 14
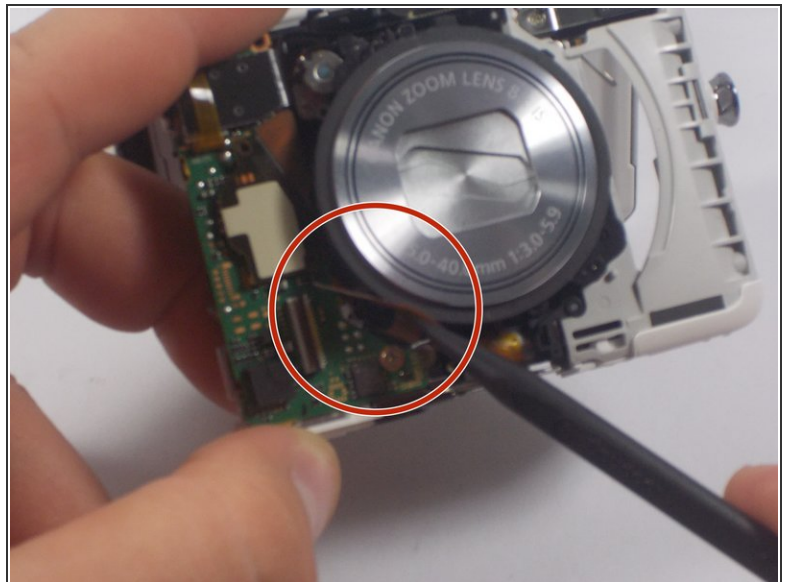

- Using plastic spudger, push tab to release the ribbon cable.
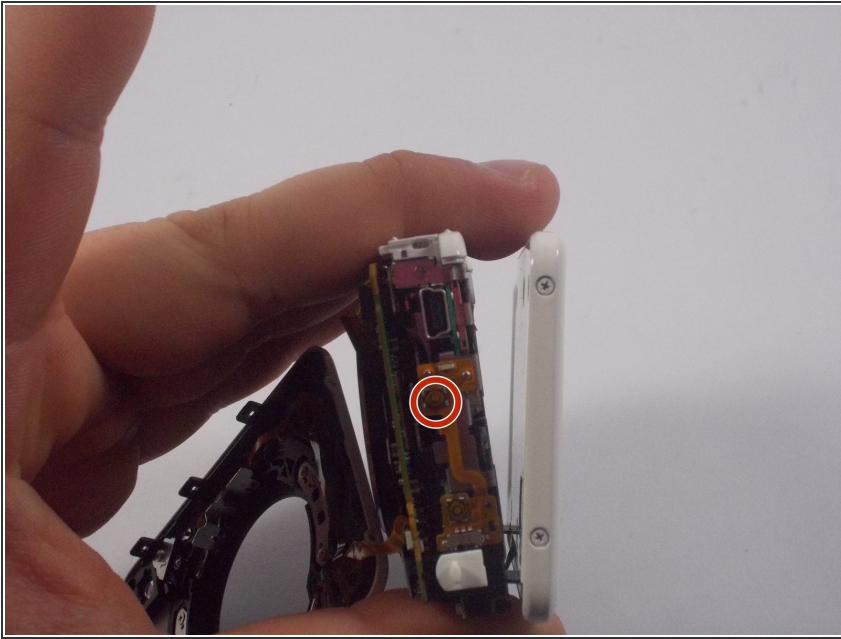

Step 15

- Locate screw under released ribbon cable and remove it.
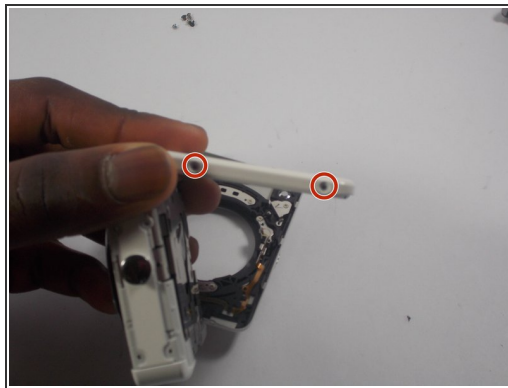

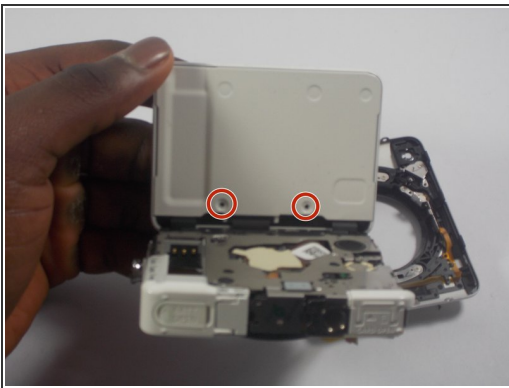

Step 16

- With the camera lens facing you, remove 4 screws around the lens.

Step 17

- Flip over and remove 1 screw from side with playback/phone options .

Step 18

- Unscrew 2 screws from top, bottom, and both sides of screen.
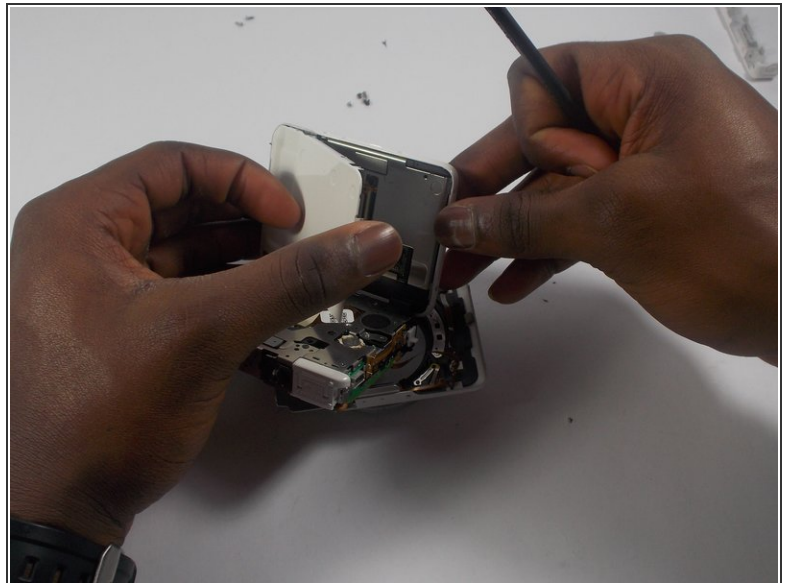

Step 19

- Pull off white cap which edges the screen.
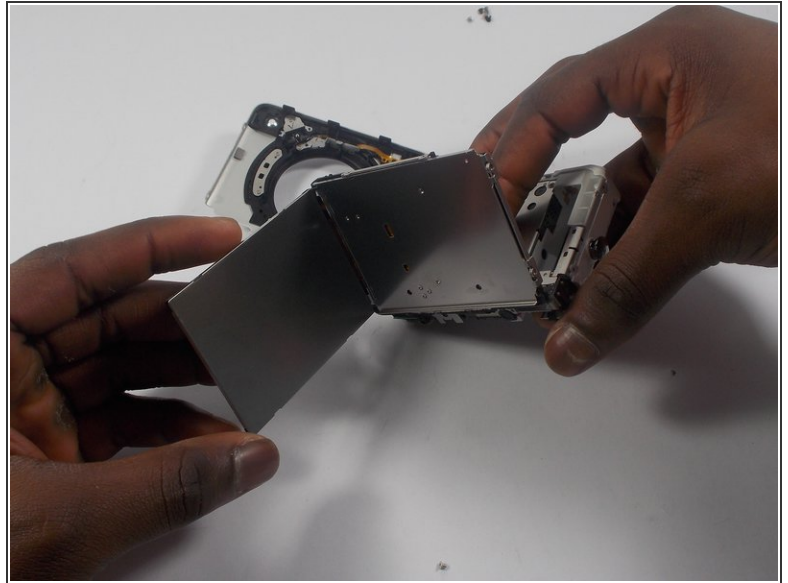

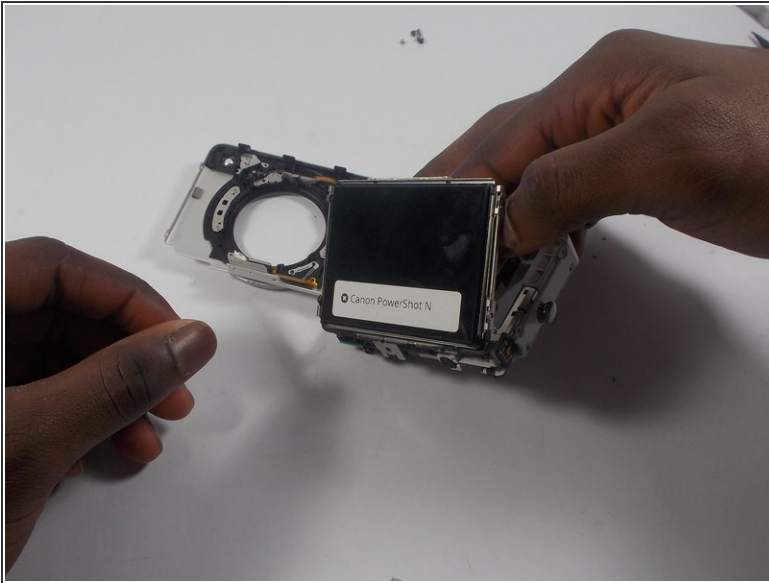

Step 20

- Remove white metal plate behind screen (tip: try not to bend).

Step 21

- Push out LCD screen.
