Step 1 — Microphone

● Remove the six 10mm Torx T10 screws on camera face.

Step 2

● Remove the exterior lens cover.

Step 3

- Remove the LED foam ring with tweezers.

⚠ Be aware, the electronic components of the LED board may be compromised if you use your fingers instead of tweezers for this step.

Step 4

- Remove the two 5mm Phillips #1 screws.

- Remove the two 8mm Phillips #0 screws.

📌 When reassembling, tighten the left and right 8mm screws first. Followed by the top and bottom 5mm screws.
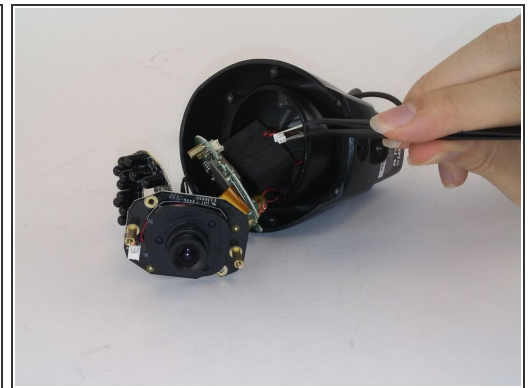

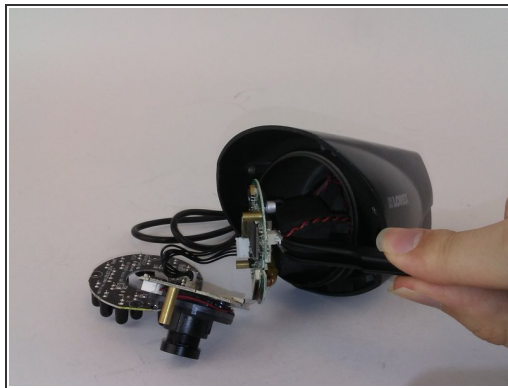

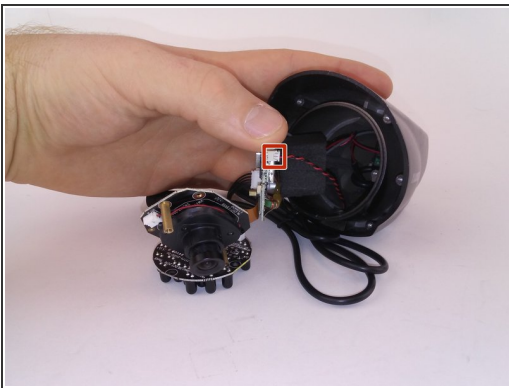

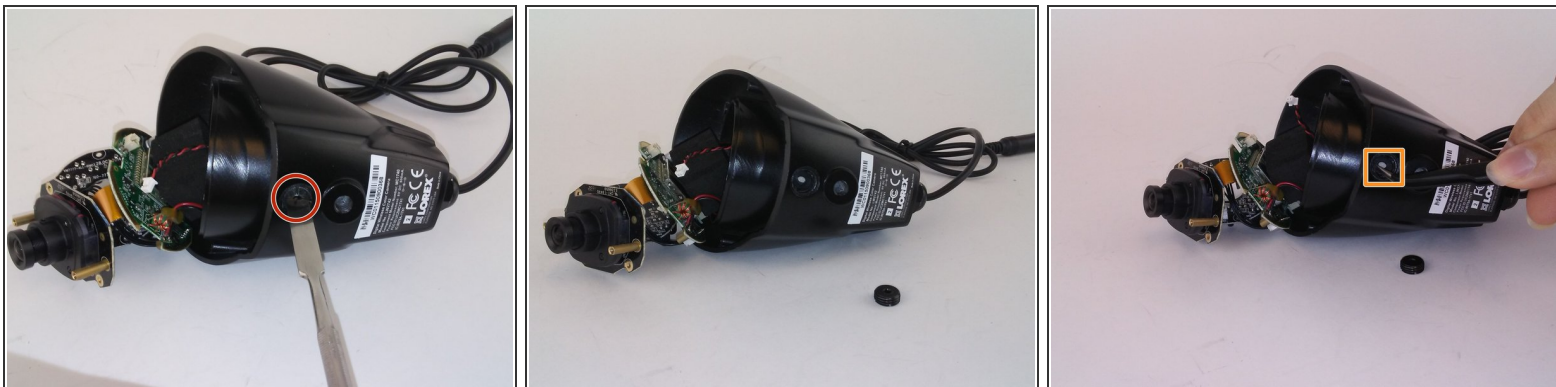

Step 5

- Remove the two 5mm Phillips #1 screws.

Step 6

- Use tweezers to disconnect the microphone wires from the internal components of camera.
