# Lorex LW2742 Night Vision IR LEDs Replacement

Replacing the Night Vision IR LEDs in your Lorex LW2742 security camera

Written By: craig crisci

INTRODUCTION

Is your night vision too dark to view, or not working at all? Replacing your camera's Night Vision IR LEDs might solve these problems.
🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Phillips #1 Screwdriver (1)
- Tweezers (1)
- TR10 Torx Security Screwdriver (1)

Step 1 — Night Vision IR LEDs

- Remove the six 10mm Torx T10 screws on the camera face.
Step 2

- Remove the exterior lens cover.

Step 3

- Remove the LED foam ring with tweezers.

⚠ Be aware, the electronic components of the LED board may be compromised if you use your fingers instead of tweezers for this step.
Step 4

- Remove the two 5mm Phillips #1 screws.

- Remove the two 8mm Phillips #0 screws.

★ When reassembling, tighten the top and bottom 5mm screws first, followed by the left and right 8mm screws.

Step 5

- Use tweezers to unclip the cables to the LED board

To reassemble your device, follow these instructions in reverse order.
