INTRODUCTION

Upgrade or replace the ram in your Dell Inspiron 9300

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Heavy-Duty Spudger (1)
- Anti-Static Wrist Strap (1)

This document was generated on 2020-11-28 05:17:34 AM (MST).

Step 1 — RAM

- Flip the computer over and place it on a clean level surface.

- Loosen the screws using a #0 Phillips screw driver.

⚠️ It is strongly recommended that the [Anti-Static Wrist Strap](#) is used to avoid damage to internal components.

ℹ️ The screws are secured by retainer clips in the plastic panel and are not fully removable.

Step 2
- Remove the plastic panel.

Step 3

- Carefully pry away the retaining clips on either side of the ram modules using a [spudger](#) tool, until the card pops away from the motherboard.

- Repeat for the second ram module if necessary.

Step 4

- Carefully pull the ram modules out of it's slot, away from the motherboard.

To reassemble your device, follow these instructions in reverse order.
