

LG Voyager Battery Replacement

This guide will help you repair a defective battery.

Written By: Faizah Butt

INTRODUCTION

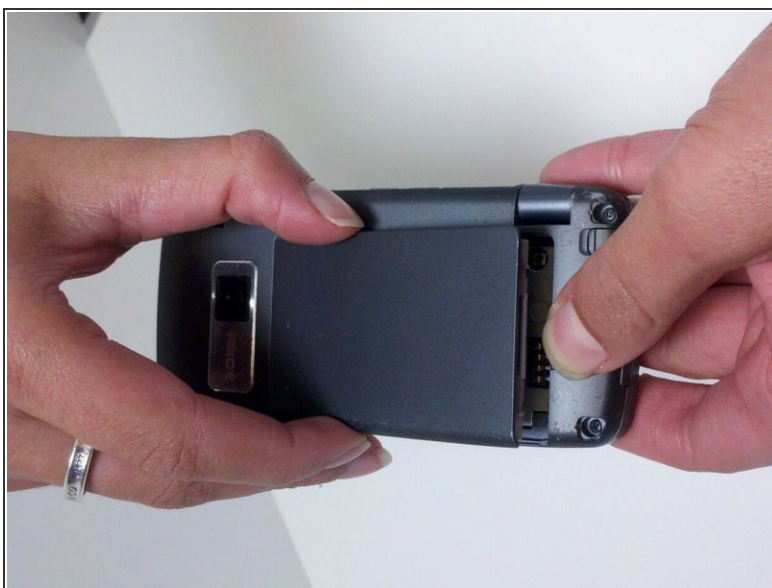

If you're having issues turning on your phone or if it has a short battery life, there is a possibility that your battery is defective.

Step 1 — Battery

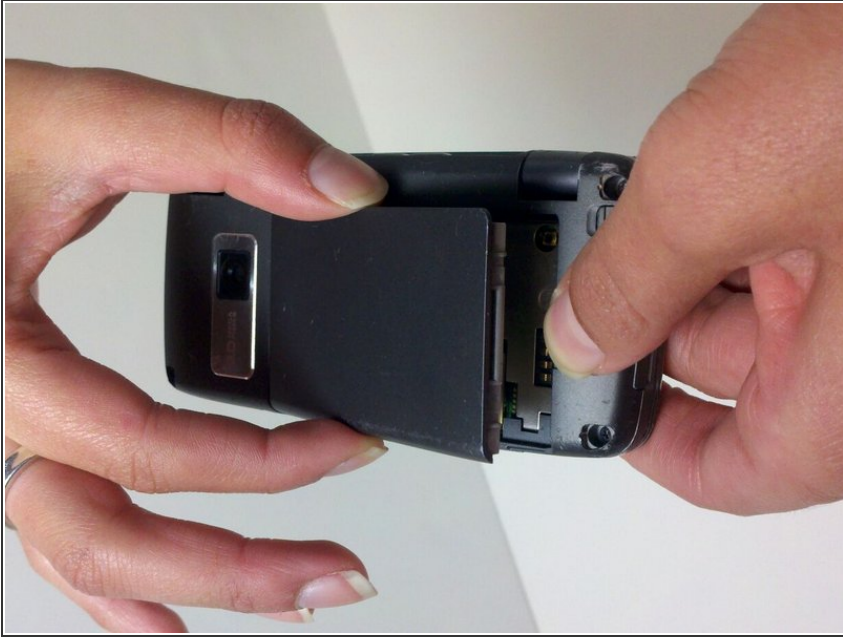

- Hold down the button below battery.

Step 2

- Simultaneously lift the battery out of the phone.

Step 3

- Replace with the new battery.

Step 4

- Turn the phone back on to make sure it is working.

To reassemble your device, follow these instructions in reverse order.
