Step 1 — Battery

- Locate the battery compartment on the back of the camera. It is the panel with the plastic ridges for simple removal.

- Slide the battery compartment cover down off of the camera body.

Step 2

- Pry up the battery from the bottom using a finger and remove the batter from the case.

Step 3 — Lens Protector

- Remove the lanyard by pulling the grey lace through the black string loop.

- Pull black string loop through the silver bracket.

Step 4

- Use a plastic opening tool to pry off the black control cover.

- (i) The face plates are glued, so use force to pry the face plates from the camera body.

Step 5

- Use a plastic opening tool to pry off the ridged back face plate and the black button.

- ⓘ The face plates are glued, so use force to pry the face plates from the camera body.

- ⓘ The button is loose and should come off with little or no effort.

Step 6

- Use a plastic opening tool to pry off the silver face plate.

- ⓘ The face plates are glued, so use force to pry the face plates from the camera body.
Step 7

- Open the USB cover to expose the small machine screw.

- Use the Phillips #00 screwdriver to unscrew the six 0.5cm machine case screws (distributed around the camera body).

- (i) These small screws are easy to lose. Place the removed screws in an organized container to avoid losing them.

Step 8

- Pull off the side control panel.

Step 9

- Flip open the screen by pulling the loose end of the screen away from the case.

- Use tweezers to remove the two outside rubber dots to reveal the two 0.5cm machine screws.

- Use the #00 Phillips Screwdriver to remove both screws.

Step 10

- Pull the body apart from the bottom of device just enough to make space to remove the silver plastic strap holder.

- Use tweezers to remove the silver plastic strap holder.

- Use a plastic opening tool to pry off the lens protector.

To reassemble your device, follow these instructions in reverse order.
