

# Toshiba Satellite C55-C5240 Screen Replacement

This guide shows you how to remove the screen.

Written By: Angela Rodriguez

---

## INTRODUCTION

When the screen is cracked or just does not work, it will need to be replaced. This is the guide you need to help you do that.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Tweezers](#) (1)
  - [Phillips #1 Screwdriver](#) (1)
  - [Phillips #00 Screwdriver](#) (1)
-

## Step 1 — Battery

**i** Make sure you turn off the laptop before starting.

- Remove the two 6.5mm PH1 Phillips screws securing the battery.

## Step 2

- Pull the battery out, keeping it flat and parallel to the laptop so that it slides out easily.

### Step 3 — Back cover

- Unscrew the ten 6.5mm PH1 Phillips head screws that hold down the back cover.

### Step 4

- Using the plastic opening tools, open the back cover and remove it from the laptop.
- ⓘ It is recommended that you start from a corner and run the tool along the edge of the cover.
- ⚠ Be careful not to bend or crack the cover.

## Step 5 — Screen

- Carefully disconnect these three cables.

## Step 6

- Open the laptop at a right angle to make the later removal much easier.

## Step 7

- Unscrew the four PH1 Phillips head screws on the hinges.

## Step 8

- Separate the screen from the rest of the laptop.
- ⓘ Make sure the cables do not catch on the bottom piece.

## Step 9

- Using a pair of tweezers, remove the two stickers on the bottom of the screen.
- Unscrew the two screws underneath.

## Step 10

- Stick the plastic opening tool underneath the screen bezel and run it along the edge of the screen.
- ⓘ Loosen each hinge separately, it would be more difficult otherwise.

## Step 11

- Unscrew the four inner screws around the screen.
- ⓘ Leave the two outer screws on the top alone.

## Step 12

- ⓘ Mind the cable on the bottom of the screen.
- Simply lift the screen out.

To reassemble your device, follow these instructions in reverse order.
