

# Amazon Tap Battery Replacement

This guide will display how to replace the Amazon Tap battery.

Written By: Hillary Baker

---

## INTRODUCTION

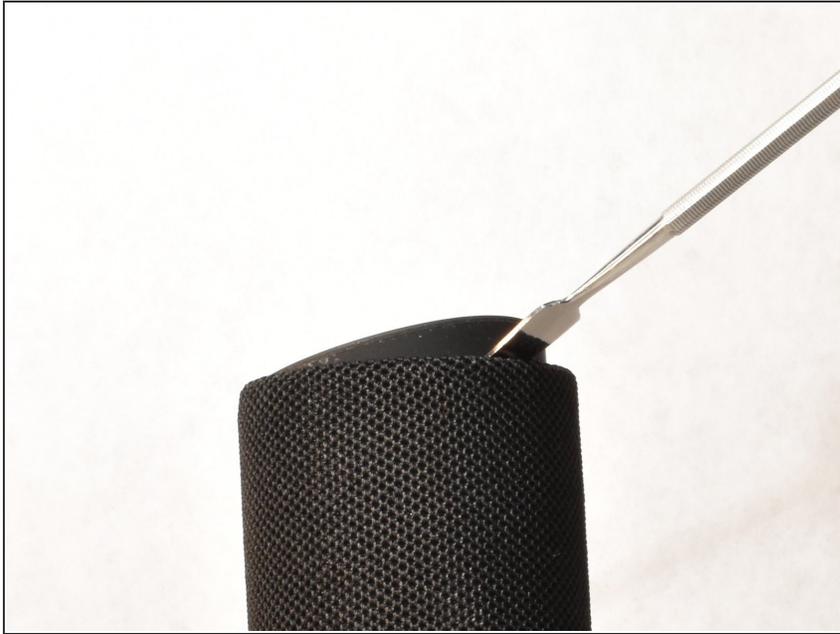

This brief guide will instruct you on how to replace the battery in your Amazon Tap.

---

### TOOLS:

- [Metal Spudger](#) (1)
  - [T6 Torx Screwdriver](#) (1)
  - [Tweezers](#) (1)
-

## Step 1 — Battery

- Use the metal spudger to remove the rubber control panel at the top end of the speaker.

## Step 2

- Turning the speaker to the bottom end, peel back the Tap's rubber footing.
- Use a T6 screwdriver to remove the the Tap's base.

### Step 3

- Time to break through the Tap's exterior. The only way to disassemble the Tap is from the outside.
- First, remove the Tap's stretchy fabric wrap. Unroll the stretchy fabric from the sticky cowling.
- After removing the stretchy fabric completely, the adhesive cowling remains.

### Step 4

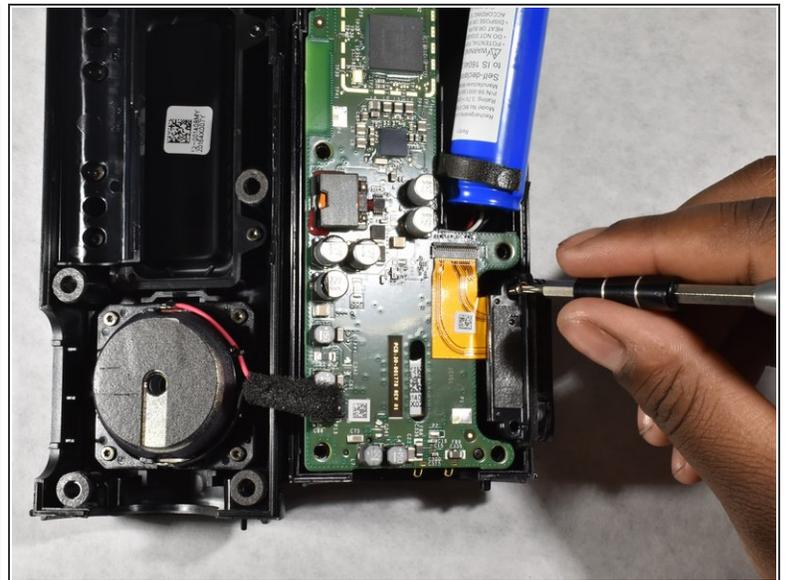

- Next up: removing the cowling.
- ⓘ This step requires many pry tools, and even more patience.
- The key to remove the cowling is to slide it over the microphone, Bluetooth, and power buttons.
- Once the cowling is off, only a few screws remain until the interior is reached. Progress!

## Step 5

- Use a pair of tweezers to remove the speaker button while using another pair of tweezers to hold the button steady.
- Since the button is round, it is best to hold it steady and wiggle it in a slow motion until it comes loose.

## Step 6

- Once you remove the buttons its safe to pull apart the Amazon Tap.
- Here you will find a standard 18650 Lithium Ion cell battery.
- Carefully remove the Lithium Ion Cell Battery and insert a new one.

To reassemble the Amazon Tap device, follow these instructions in reverse order.
