

# Logitech G502 Proteus Core Mouse Feet Replacement

How to replace the sticker-like feet of your Logitech G502 Proteus Core when dirty or if accidentally torn when attempting to reach the screws they cover.

Written By: Sage Farray

## INTRODUCTION

There may come a time when the feet of your mouse become worn or torn and you want to replace them. Follow this guide to replace the feet on your G502 Proteus Core Mouse.

The feet of your mouse needs to be intact for the mouse to be able to glide smoothly on your mouse pad. This is important for competitive games where mouse movements need to be quick and precise.

### TOOLS:

- [Spudger](#) (1)

### PARTS:

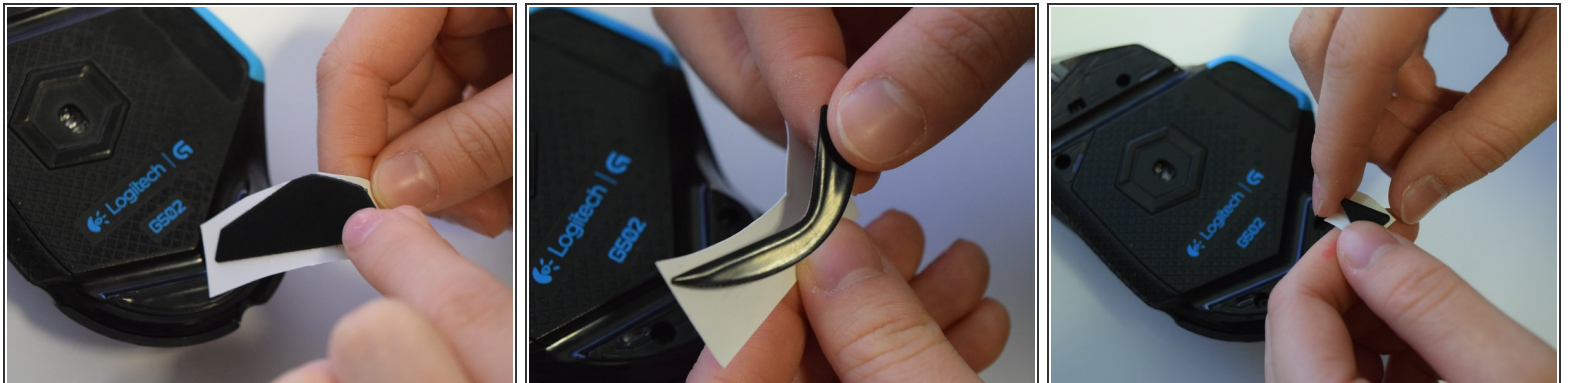

- [Replacement Logitech G502 Proteus Core feet](#) (1)

## Step 1 — Mouse Feet

- Use your fingers or a nylon spudger to peel the old feet off all three corners where the screw holes are exposed.

## Step 2

- Peel the backing off the new mouse feet to reveal the adhesive.

## Step 3

- Apply the new mouse feet to their designated areas based on shape.

## Step 4

- Apply even pressure across the mouse feet to ensure adherence.

## Step 5

- Let adhesive sit for about 5-10 minutes with applied pressure.

To reassemble your device, follow these instructions in reverse order.
